# पांच "ज"

पांच "ज" के मिलने से बनता है शब्द जलागम, जल, जंगल, जमीन, जानवर और जन का है ये समागमी

> जल स्रोत थे बहुत ही कम, रहते सूखे वे हरदमी

जलागम ने किया जल स्रोतों का विकास, कार्य किया कुछ बहुत ही खासी

> खित्तया खोदी डैम बनाये, ताकि जल में बढ़ोत्तरी आये।

जंगल सूखे वृक्षों की संख्या हो गयी अल्प, जलागम ने इन्हें बचाने का लिया संकल्पी

बंजर भूमि में पेड लगाये, ताकि बंजर भूमि बंजर न रह जाये।

जानवरों की संख्या में जब कमी आयी, तो जलागम ने एक रीत चलाई।

निर्बल लोगों को दिया रोजगार का सहारा, ताकि उनकी आमदनी बढ़े घर में हो उजियारा।

पांच "ज" के मिलने से बनता है शब्द जलागम जल, जंगल, जमीन, जानवर और जन का है ये समागमी

> रेखा रावत, महिला प्रेरक जैन्तोली मल्ली, यूनिट पाटीसैण, पौड़ी प्रभाग

# **Qualitative Review:**Social Aspects of the Project (2017-18)

# (I) Background:

In the State of Uttarakhand water, agriculture, forestry, energy, chekcing the incidence of migration and increasing employemnt are some of the issues which form the core strartegy for the future growth. Over three-fourth of the total population in the state depends upon agriculture for its livelihood and most of the landholdings are small and scattered. Poverty is a serious problem with 36.5 percent of the State population living below the poverty line. Situation is even worse in mountain areas of the state where around 38.5 percent of the population is living below the poverty line (Source: Poroject Operation Manual, UDWDP Phase II). Uttarakhand Decentralized Watershed Management Project (UDWDP) Phase II is being implemented by the Gram Panchayats since July 2014. UDWDP Phase II has hired Society of People for Development (SPD) as FNGO in four divisions of Garhwal region, namely, Pauri, Tehri, Dehradun and PMU (MWS), Raipur w.e.f. March 2015.

Focus of the project is to develop and enhance productivity of rain fed areas by adopting a participatory watershed management appraoch in 202 Gram Panchayats (GP) and 401 Revenue Villages (RV) in these four Divisions of Garhwal region spread over 6 Development Blocks of 3 districts having the problem of soil erosion, poverty and lack of infrastructure facilities. The intervention area covers over 30 Micro Watersheds (MWS) in Tehri, Pauri, Dehradun and PMU MMWS in Raipur division. As per the baseline survey conducted in 2015, there are 18345 households across these four divisions of which 7062 households are in Tehri Division, 5165 in Pauri Division, 5423 in Dehradun Division and 695 in PMU MMWS, Raipur.

# (II) Project Development Objective:

**The Project Development Objective (PDO)** is to improve the productivity potential of natural resources and rainfed agriculture with participation of communities in selected microwatersheds in the State of Uttarakhand.

The Project implementation envisages a decentralized and participatory approach with financial autonomy to the PRIs which are legal institutions under 76th amendment. Focus of the Project is to enhance community participation in watershed development and management with a view to improving and strengthening administrative capacities of GPs for efficient delivery system. Institution building at the community level is the prime focus of the Project with FNGO forming various small community groups for smooth functioning of the Project at village and GP level ensuing equitable participation by all groups, especially the landless and women who rely disproportionately on common-pool resources for fodder, fuel and other forest products. CBOs in the Project area have been consolidated and strengthened through various capacity development initiatives involving trainings, exposure visits and workshops.

Developing backward and forward linkages between the farmers and market, the FNGO has facilitated the capacity development plan for various community groups such as FIGs, UGs, VGs, and FFs of Gramya-I. While developing backward and forward linakages, FNGO facilitated awareness generation and information disseemination on improved varities of seeds, demostration of technology and conducting market survey products of FIG across all the four Divisions. To improve the sale of their products, the FNGO mobilized and motivated the farmers and ensured their participation in various exihibitions for display of their products at stall for sale. These exihibitions help them in providing them a platform display, sale branding of their products as also help inculculcating in them businessmanship besides

developing their understanding on market demand and pricing of products. These platforms have been instrumental in opening up new avenues of livelihood for the village community.

# (III) Result Framework:

The achievement of project development objective will be determined through the following key indicators using baseline survey data conducted during the first year, with that of midterm assessment and final evaluation:

- Improved natural resources conservation (NRC) outcomes in target MWS
- Increased productivity of arable land
- Percentage increase in income through project intervention.
- Direct project beneficiaries

# (IV) Project Components:

- Social Mobilization and Participatory Watershed Planning
- Watershed Treatment and Rainfed Area Development
- Enhancing Livelihood Opportunities
- Project Management

# (V) Safeguard Policies Applicable to the Project:

## (i) Environmental Assessment:

During the planning phase of the Project, FNGO has facilitated the process and experts discussed on the basis of it social and environmental impacts of activities which were proposed by the villagers. It help to ensured the environmental and social soundness and sustainability of investment project. The result of that they supported integration of environmental and social aspects of project in the decision-making process during the preaparation of GPWDPs. When implemenating the AWPs the social and environmental aspect of activities were kept in mind.

#### (ii) Natural Habitats:

Promoting environmentally sustainable development by supporting the protection, conservation, maintenance, and rehabilitation of natural habitats and their functions have been the key intervention areas of the project. To achieve this, the FNGO and MDT teams discussed the benefits of environmently susutainable activities at RV level during the PRA excersie to prioritize the problems and priorities of village

community. This facilitated the process for implemention of AWPs across all the four Divisions.

## (iii) Pest Management:

This focused on minimizing and managing the environmental and health risks associated with indiscriminate use of pesticides and promote and support safe, effective, and environmentally sound pest management methods. FNGO and MDT teams regularly motivated households on use of compost and vermi compost in the fields. To achieve this objective, trainings and exposure visits to the sites where farmers are using bio fertilizers and bio pests were facilitated. Various farmers have adopted the bio pest methods for control of insecticides.

### (iv) Physical Cultural Resources (PCR):

Assisting in preserving PCR and in averting their destruction or damage is an important activity of the project. PCR includes resources of archeological, paleontological, historical, architectural, religious (including graveyards and burial sites), aesthetic, or other cultural significance.

### (v) Involuntary Resettlement:

The project also focuses on avoiding or minimizing involuntary resettlement and, where this is not feasible, assist displaced persons in improving or at least restoring their livelihoods and standards of living in real terms relative to pre-displacement levels or to levels prevailing prior to the beginning of project implementation, whichever is higher.

## (vi) Indigenous People:

Designing and implementing projects in a way that fosters full respect for indigenous peoples' dignity, human rights, and cultural uniqueness so that they (1) receive culturally compatible social and economic benefits, and (2) do not suffer adverse effects during the development process. To sensitize indigenous people, the FNGO team facilitated the process for transhumant population and provided support in organizing camps for this purpose. The transhumant population or Gujjar stayed in Thatyur, Nainbag, Aglar bridge, Vikas Nagar and Sahiya during their movement.

#### (vii) Forest:

The project is dedicating to Realizing the potential of forests to reduce poverty in a sustainable manner. The application and mitigation of all the safeguard policies are covered in the Environmental & Social Management Framework (ESMF) applicable

to the Project.

# (VI) Role of FNGO:

The Field NGO is playing a significant role in implementing participatory watershed development projects in planning, implementation, monitoring and evaluation activities of the project. Field NGO (FNGO) ensured and facilitated the participation of village communities in project activities. There is social structure, attitude and dynamics pravelent in the community for participation in implementation of participatory project. The FNGO successfully filled this gap by provided support of qualified and professional staff in the project villages in Garhwal region in Gramya-II. The main roles of FNGO in Uttarkhand Decentralized Watershed Development Project Gramya-II is as follows:

# (i) Participatory Watershed Development planning & Implementation:

Uttarakhand Decentralized Watershed Development Project (UDWDP) Gramya-II is a community demand driven project. Therefore, the FNGO contacted and mobilized the villagers and generated awareness among them by disseminating information on project activities through rapport building; awareness generation meetings; personal interactions; printed material on UDWDP; workshops;p trainings and exposure visits within and outside the state across all the four Divisions, namely, Dehradun, Tehri, Pauri and PMU MMWS in Raipur.

# (ii) PRA, Awareness Building and Community Mobilization:

After creating a conducive environment at the village level, the FNGO facilitated the process of PRA and preparation of GPWDPs. FNGO intitiated the process of Participatory Rural Appriasal under which various PRA exercises were conducted for identification of their problems to enable participatory bottom up planning process with technical support by MDT. Plans were collected from the RVCs and the same were approved in case of 201 GPWDPs during second year (2016) of the project. One Gram Panchayat, namely, Mothi in Dehradun Division Vikasnagar has been added during this year (2017-18). Due to some reciprocal dispute among the villagers, the GP could not taken up under the Project earlier. This year FNGO with MDT support has initiated PRA exercise for planning and preparation of GPWDP. Proposals have been collected and sreened as per the norms of ESMF and incorpoarated into the GPWDP. The GPWDP has thus been prepared and approved. Women Aam Sabha has been organised and their proposals have also been incorporated in the GPWDP. Wealth ranking of households has been done by the

FNGO and plan for vulnerable households has been prepared in accordance with the demand of vulnerable households. Tent house has been proposed by the VG for alternative livelihood of group members. The FNGO field staff along with MDT memebrs are disseminating project related key information amongst the community and encourage them for active participation in implementation of GPWDP as well as in identification of vulnerable households using wealth ranking data of the village. Apart from this, the vulnerable households who did not show inclinationm to work in groups have been selected as individual beneficiaries for grant under Vulnerable Group Fund (VGF). Vulnerable households have been organized into groups by the FNGO field team and have faciliated initiation of their income generating activity. Further, the FNGO also generated awareness as to the need for soil conservation, water resource management, ESMF and other NRM interventions across all the four Divisions, i.e., Dehradun, Tehri, Pauri and PMU, MMWS, Raipur of Grahwal region.

#### (iii) Gender Issues:

FNGO team mobilized the local community, especially women folk, and discussed with them the diverse issues related to project. As a result of mobilization, women and men equally participated in meetings and other project related activities. Regular efforts and contacts with the community members has resulted in building up of trust between project staff and community helping in strengthening of project implementation process. Consequent upon awareness generation activities, women have developed an understanding about project activities and have build up a confidence in them, thus enabling them have their say regarding project activities and interventions. As a result of rapport building among project staff and the community, the FNGO field staff has been able to promote institution building at GP and RV level with the formation of several groups as per project requirements.

Addressing gender issues by promoting women participation in project activities had been the key focus area of project interventions, which has been well addressed by the FNGO by ensuring more than 50% representation of households by women in WAS and other project meetings. To begin with, owing to regular persuasion by the FNGO field staff, women started participating in village level meetings and gradually they began to participate in discussions and made proposals for being incorporated in GPWPD. Mobilization of women had been constantly taken care of by the project field team thus encouraging the women to participate in project meetings, trainings, workshops and exposure tours. Participation of women in project meetings, which initially stood at less than 5% in WAS meetings, has reached more than 50% in terms of representation of households. As a matter of fact, the

participation of women in WAS and other project meetings is between 35 to 40 percent, whereas going by representation of households by women in these meetings, the same had been around 60% during the year 2017-18. This has been invariably maintained in the project meetings, be it WAS, AWP or PME meetings.

FNGO, SPD is providing services in the project areas under the social component in Garhwal region and covered 202 Gram Panchaays and 401 Revenue Villages. Besides this A team of social staff from Project Director Level to unit level and mobilizing the villagers. And doing work as integal part of Multidisciplinary Team (MDT) in close coorperation in each Division.

### (iv) Local Institutions Development and Capacity Building:

In addition to this, FNGO organized women into groups all across the four Divisions and assisted in the conduction of women Aam Sabha in each Revenue Villages of the project. During the planning phase of Gramya II, the women Aam Sabha in the four Divisions was organised on monthly basis and their proposals were taken in the general meetings of women. After scrutiny of proposals in accordance with the norms of ESMF and demands of the women as well as the villagers (in case of fodder plantation), these proposals were incorporated in the Annual Work Plan of respectives Gram Panchayat. Besides these, FNGO team also worked for institutional building and assisted in the formation of User groups for maintenance of water structures constructed by GP.

## (v) Sustainability of Institutions:

During the year 2017-18, the FNGO team worked towards ensuring sustainability of Institutions. Various groups such as VGs, UGs, FIGs and FFs of Gramya I, were formed in all four Divisions. The FNGO team assisted in organizing vulnerable households into groups to initiating alternative income generating activities and assisted in maintaining their records. Similarly, in case of User Groups, the FNGO team motivated the User Group members to deposit their contribution for maintenance of water structures for their long term sustainability.

# (vi) Micro Credit and Micro Enterprises Development:

FNGO keeps on motivating the Vulnerable Groups and Individual beneficiaries on regular basis to run their IGAs and save money from their earnings after bearing their family expenses. Some of the VGs have deposited their earnings made from their collective IGAs into their groups accounts. Beside, FIGs have been formed at the Ravenue Village levels for promoting various agricultural activities.

FNGO motivated and mobilized these groups for saving and generated the corpus fund of FIGs with contribution by members. The FNGO also took the initiative towards developing banking habits among FIG members (FIGs) with the help of their corpus fund. Various FIGs are involved in micro loaning on minimal interest rates. The interest rates to be charged from the members have been decided by the group members themselves.

Similarly, in the case of User Groups, FNGO field staff supervise their record keeping through during their monthly meetings and motivate them to deposit their contribution into User Group accounts.

#### (vii) Networking and Market Linkages:

FNGO team also facilitated the process for marketing of products prepared by the groups to enable them fetch a better price. Various FIGs across the four Divisions are engaged producing pickles, Juice, Sauce, Ghee and value addition of local products like pulses etc. and selling them in the market.

#### (viii) Process Documentation:

To assess the impact of project interventions, the FNGO team captured the data from various project activities like compost making, vegetable cultivation, poultry, dairy farming, plantation and documented them as case studies and success stories. During the year, a number of case studies were documented and published in the monthly progress reports from time to time.

#### (ix) MIS Handling:

Management Information System is a crucial component of the project. FNGO team maintained the records of data regarding social mobilization of various activities at their office in the form of reports, presentation and case studies.

# **Scope of Services: Physical Progress Report for FY 2017-18**

# **Social Mobilization, Institution Building and Enhancing Livelihood Opportunities**

D	Deliverables	· ·	get/ nber		Achievements/ Remarks
D1	Meetings, PRA, GPWDP and WA	S			
A1	i) Social Mobilization, Rapport building and Awareness generation in Project area.	201 GPs	400 RVs	•	FNGO staff faciliated meetings, workshops and visits in all 201 Project GPs and ensured the implemenation of their AWP.
	ii) Baseline survey of GP Mothi in Kwansi unit			•	One GP Mothi has been added in Kwansi unit and baseline survey of the same was initiated in March 2018.
A2	Total Households 18295 and households under wealth ranking in all four Divisions	201 GPs	400 RVs	•	<b>Pauri</b> – 5165 HHs, (A Category 1007 (19.49%), B Category 2083 (40.32%) and C Category 2075 (40.17%)
				•	<b>Tehri</b> – 7062 HHs. A Category 1249 (17.68%), B Category 2718 (38.48%) and C Category 3085 (43.68%)
				•	<b>Dehradun</b> - 5373 HHs. A Category 1048 (19.44%), B Category 1719 (31.99%) and C Category 2606 (48.50%)
				•	<b>PMU, MMWS, Raipur</b> - 695 HHs. A Category 170 (24.46%), B Category 272 (39.13%) and C Category 253 (36.40%)
A3	Ensuring participation of women in programmes and management of project activities through organization of Women Aam Sabhas in their	201 GPs	400 RVs	•	Women Aam Sabhas were organised on quaterly basis in all 201 GPs covering 400 RVs across the four Divisions of Garhwal region.
	respective RVs.			•	Overall repersenation of households during quarter-I was 63% and attendance of women 39% across the four Divisions.
				•	During quarter-2, repersentation of

D	Deliverables		get/ nber		Achievements/ Remarks
					households has remained 59% with 36% women attendance. During fourth quater, the repersenation of HHs was 63% and attendance of women was 36%.
				•	During last quater of the year, repersenation of HHs has improved which stood at 63% against 37% attendance of women.
				•	As a rule, only one woman participates in WAS from one HH. The percentage of women attending WAS indicates only adult women leaving out girls and older women. Thus, the percentage of women attendance remains low as against HHs represented by women.
A4	Participation of women in Gram Sabha Meetings (i) Total Gram Sabha Meetings held	201 GPs	400 RVs	•	During this financial year (2017-18), 1563 open Meetings of Gram Sabha (GS) were held in 201 GPs across the four Divisions.
	(ii) Percentage of women attending Gram Sabhas Metings			•	In Dehradun Division 182 Gram Sabha Meetings were held in total 54 GPs under the project with 52% attendance of women
				•	In Tehri Division 137 open Meetings of Gram Sabhas were held in 78 project GPs during FY 2017-18 with 36% of women participating in these meetings.
				•	In Pauri Division 101 open Meetings of Gram Sabhas were held during the year in 62 project GPs with 60% participation of women.
				•	Similarly, in PMU, MMWS, Raipur 7 Open Meetings were held during this finnacial year in 7 GPs of the project. Attendance of women in these meetings was 48%.
D2	Vulnerable Households				
A5	In identification of vulnerable households in the villages through participatory approach, maximum coverage	528 No.	201 GPs & 400 RVs	•	FNGO facilitated the process for Identification of Vulnerable households in Project RVs benefitting total 609 households

D	Deliverables	1	get/ nber		Achievements/ Remarks
	is given to the poorest of the poor {Vulnerable Individuals (VI)} who are assisted in selection of suitable IGA for their alternative livelihood			•	during the year 2017-18 across the four Divisions.  Achievement in coverage of poorest of poor households under Vulnerable Individuals was 115% against the given target for the year.  Across all the four Divisions, the formation of Vulnerable Groups was below expectation due to migration of male members. Another reason was disinclination of people to work under collective approach. Another reason was that the households are Identified under vulnerable categories they were not ready to work together and possibilities of collective IGAs were also not feasible. Thus the target of vulnerable Individuals was increased.
A6	Identification of vulnerable households in the villages through participatory approach and facilitating their organisation into Vulnerable Groups (VG)} and assisting in selection of suitable IGA for their alternative livelihood	168 No.	201 GPs & 400 RVs	•	During the financial year 2017-18, the target was set up for formation of 168 Vulnenrable Groups (VGs). FNGO team explored the possibilities for formation of VGs in various RVs where vulnerable households were Identified. It was observed that people generally do not show much interest in collective working and prefer working individually. However, a few HHs who volunteered to work collectively were formed in groups. Thus, total 81 Vulnerable Groups were formed across four Divisions during the year against the target of 168. Due to less potential for collective working, the target for formation of VG was revised downward.  In all the four Divisions, 1154 Vulnerable Individual HHs have benefited from VG Fund till March 2018.  By the end of March 2018, 168 VGs were formed in all the four

D	Deliverables	Target/ Number	Achievements/ Remarks
			Divisions benefitting 991 HHs from this activity.  In all four Divisions 2145 HHs.
D3	User Groups (UG) & Maintenand	ce Fund	
A7	Assisting in formation of User Groups (UGs) with MDT in project location where water structrues are constructed by the GP under GPWDP		<ul> <li>FNGO team mobilized and motivated the user community enjoying the benefits of water bodies constructed during the year (2017-18). As a result of mobilization, 120 new User Groups were formed during the year for maintenance of these water structures in all the four Divisions.</li> </ul>
			<ul> <li>Thus, the total number of User Groups formed in the four Divisions are 263 till March 2018.</li> </ul>
A8	(i) Facilitating UGs for developing and adopting byelaws of UGs		<ul> <li>FNGO team assisted UGs in all the four divisions in preparation of byelaws for smooth functioning.</li> </ul>
	(ii) Assisting in opening of bank accounts of UGs in nearby Bank		<ul> <li>After framing of byelaws, 88 newly formed User Groups opened their joint accounts in the neraby Bank.</li> </ul>
	(iii) Motivating and mobilizing UGs for depositing their contribution in joint O&M Bank accounts for maintenaince of water structrues		<ul> <li>By the end of financial year 2017- 18, all the divisions put together, the total amount available in User Group accounts is Rs. 4,51,876.00. The fund will be utilized in maintenance of water bodies after withdrawal of the Project.</li> </ul>
D4	Capacity Building of CBOs		
A9	<ul> <li>(i) Assisting MDT in preparation of capacity building plan for VGs, UGs and FIGs</li> <li>(ii) Providing technical support and training to User Groups</li> </ul>		<ul> <li>FNGO team assessed the training needs of VGs, UGs and FIGs for effective functioning and prepared capacity buiding plan for these groups and facilitated in conducting regular meetings, recording checking, management of group fund, collection of contribution and depositing the same into groups' accounts.</li> <li>Asssisted in trainings and exposure tours organised for VG, UGs, FIG's members.</li> </ul>

D	Deliverables	Tarş Nun			Achievements/ Remarks
A10	Social Audit using Participatory	Monitorin	g & Evalu	ation	(PME) Tools
	<ul><li>(i) Facilitating in conduction of PMEs in Project GPs</li><li>(ii) Providing feedback on PMEs conducted in Project GPs</li></ul>	201 GPs	200 GPs		During this year, the PME round -2 was initiated in all the 200 out of 201 GPs in all the four Divisions. PME in one of the GPs, namely Jogio in Chakrata Unit could not be conducted due to some dispute among villagers.
					During PME round-2, the FNGO facilitated the process alongwith MDT and PME teams formed in all the 201 GPs.
					During PME round-2, complete community involvement in monitorint and evaulation of works done by the GP was observed
					Community cheked the planning, implementation, handling of funds, procurement and maintenance of assests.
					The purpose of monitoring and evaluation by the stakeholders was to check that the planned interventions are being executed as per the intended objectives.
					Community gave corrective actions wherever the work was not found in line with the intended objective.

3.

# Qualitative Review of Institutions in Project Area

# (I) Social and Institutional Aspects of the Project:

A decentralized approach towards Planning, Implementation and Monitoring of the Project and setting up of Gram Panchayat as main institution is the key feature of the Project. For better planning and Implementation of works under GPWDP, Revenue Village Committee (RVC) has been formed in each Project village across all the four divisions.

# (II) Water and Watershed Management Committees (WWMCs) & Revenue Village Committees (RVCs):

Institution building in the Project areas has been the main focus of the FNGO and the same has been done by involving the village community in planning, implementation, monitoring and evaluation of project activities. Apart from these, village community is involved in handling of funds and procurement and maintenance of assets created under the Project. Gram Panchayat is the main implementing agency of Gramya II. FNGO interacts with WWMC and RVC at Gram Panchayat and village levels and provides support in record keeping and recording minutes of meetings, etc. In the Project GPs, total 203 WWMCs and 306 RVCs have been formed in the four Divisions comprising of 1120 and 3114 members, respectively. The GP level institutions are actively involving in implementation of their AWPs.

	Total Total Fema								% of

	Total	306	3114	454	181	441	643	1714	55%

# (III) Village Motivators:

One-woman motivator is designated in each Revenue village, except in case of uninhabited Revenue Villages. Thus, the total number of Village Motivators in four Divisions is 374. The role of these Village Motivators is to mobilize the village community, especially women and ensure their strong participation in Project activities at their village through Women Aam Sabhas.

For capacity building of these Village Motivators, Pauri Division organized 5 workshops each month with the support of FNGO Facilitators. It was observed that average 93% of Village Motivators participated in these workshops. Tehri Division also organized 3 workshops for these Village Motivators during each month of the year at their Project unit which were attended by about 83% of the Motivators. Similarly, Dehradun Division also organized 3 workshops for these Motivators in their respective Project units during each month of the year which were attended by 97% of the Motivators. PMU, Raipur organizes one workshop for Village Motivators every month and around 96% of the Motivators participate in these workshops.

SN	Division	No. of Motivators	Average Attendance in Meeting (%age)
1	Pauri Division	131	93%
2	Tehri Division	141	83%
3	Dehradun Division	77	97%
4	PMU (MWS) Raipur	25	96%
	Total	374	92%

Besides this, the expectation from the Woman Motivators is to facilitate the process for formation of livelihood groups comprising vulnerable households and providing all possible support to them. Although, most of the Motivators live outside the villages (other places) but it has been observed that in village level programmes, meetings and visits they come to

their villages and try to ensure complete participation of village communities and provide necessary support in identification and formation of livelihood groups comprising Vulnerable households in the Project villages across all the Divisions.

# (IV) Women Aam Sabhas:

At least 50% women participation in the project interventions is expected at the village level committees to ensure inclusion of their needs, concerns and issues emerging in Women Aam Sabhas into the GPWDPs during the planning phase. FNGO conducted 343 Women Aam Sabhas in 201 GPs during the year and included 2081 issues out of 2740 issues which were raised on fruit processing trainings, tailoring, plantation, compost pits, shelters, improved seeds, flour mill, bridal paths, mangers and exposure tours etc.

The broader purpose of the Women Aam Sabha is to review those activities that target women beneficiaries the most. After the planning phase, Women Aam Sabhas are regularly organized at the Revenue Village level on quarterly basis for implementation of their issues which were included in their respective GPWDPs. The progress of their needs, issues and concerns incorporated into GPWDPs is ongoing. Women are updated about the issues resolved by WWMC under their AWPs in monthly meetings.

Social Mobilization is an effective tool in implementation of Project activities at the village level, especially for women folk and vulnerable sections of the society, such as Schedule Caste and Schedule Tribes. FNGO team facilitated various activities for women and vulnerable sections through meetings, workshops, trainings, exposure visits, IG Activities and new techniques and technologies for agriculture and livestock. As a result of these activities, women and vulnerable sections actively participate in planning, implementation, monitoring, evaluation and decision making in the Project.

Besides these, conducting WAS, organizing skill trainings for women and supporting Vulnerable Individuals and Groups had been the key activities during the year. Brief summary of these activities is given below:

#### **WAS Part-I:**

First of all, the FNGO assessed the impact of Social Mobilization through Women Aam Sabhas (WAS) which are continuously conducted by the FNGO since planning phase. For the planning and preparation of comprehensive GPWDPs, FNGO conducted total 343 WAS. These WAS were conducted by the FNGO in two parts. In part one the FNGO assisted in conducting 304 WAS meetings covering 361 Revenue Villages in 182 Gram Panchayats (GPs) in all the four Divisions of Garhwal Region. These meetings were attended by 14531 adult women out total 30204 adult women population. These Women Aam Sabhas (WAS) raised total 2340 issues of which 1745 were incorporated in the GPWDPs of their respective GPs.

#### **WAS Part-II:**

Similarly, during Part-II, 19 comprehensive GPWDPs were prepared and FNGO conducted 39 WAS in these GPs of Tehri and Dehradun Divisions. In these women Aam Sabhas, total 2155 adult women out of 3724 women attending the meetings and raised 398 issues of which 336 were incorporated in the GPWDPs of their respective GPs.

#### **Overall Progress:**

In all the four Divisions in Garhwal region, FNGO conducted total 343 women Aam Sabhas which were attended 16686 women out of total 33928 women population. Total 2740 issues were raised in these meetings, of which 2081 were incorporated in their respective GPWDPs.

#### **Achievement:**

#### **Participation:**

The Project addressed gender issue ensuring 50% participation of women in all its activities.

Thus, the participation of 49% of the total adult women in project activities across all the four Divisions is a good indicator of women participation in planning of their GPWDPs. Conventionally, during the planning process, women did not take active part at the village and Gram Sabha levels and these meetings were dominated by male members of the community who took all decisions on behalf of women folk.

#### Voice of Women:

Gramya-II provided women Aam Sabha as appropriate forum for women, where adult women of the Gram Sabha can have their say and play an active role in discussing and raising the problems which concern them the most and collectively find solutions to them by incorporating them into the GPWDP. For the planning and preparation of GPWDPs across all the found divisions, total 343 women Aam Sabhas were conducted by the FNGO covering 400 Revenue Villages of 201 GPs. Women raised their voice through 2738 issues in the WAS.

#### **Issues Incorporated:**

After scrutinizing these 2738 issues, 2081 of them were incorporated in their respective GPWDPs across all the four Divisions, which formed 76% of the total issues raised in WAS, which speak the quality of thinking and understanding of village issues by women. The progress in resolving the issues incorporated by women in their GPWDPs are in process.

#### Participation of Women in Implementation of AWPs:

After incorporating the issues raised by women during their Aam Sabhas in their respective GPWDPs, Annual Work Plans (AWPs) were prepared in all the GPs of four Divisions and women are monitoring and tracking the progress of AWPs through quarterly general body meetings of adult women of the villages. During these WAS meetings in second year of Project Implementation, it was observed that the attendance of women is decreasing and only one women is seen participating from one household due to workload as a result of migration of people from the hills districts to the plain areas of Uttarakhand State. During the World Bank Mission visits to Garhwal region in 2016, the issue regarding attendance of women in Aam Sabhas at Revenue village level was discussed and it was reached that the representation of households by women should be considered the criteria for attendance of women in WAS meetings.

During this fiscal, FNGO conducted 360 women Aam Sabhas in the first quarter and representation of household by women in these meetings was 63%. During the second quarter, 383 women Aam Sabhas were organized where the representation of households by women was 59%. Similarly, during the third and fourth quarter of the year, the

representation of households by women across all the four divisions was 61% and 63% respectively in 348 and 397 conducted at the RV level.

The details of women Aam Sabhas conducted across all the four Divisions of Gramya-II, during FY 2017-18 are given ahead (table 1&2):

Table-1: Status of Women Aam Sabhas conducted in I & II Quarters of 2017-18

	Total	348	397	61%	36%	346	397	63%	37%	

# Quarterly Assessment of Representation of Households in Women **Aam Sabhas:**

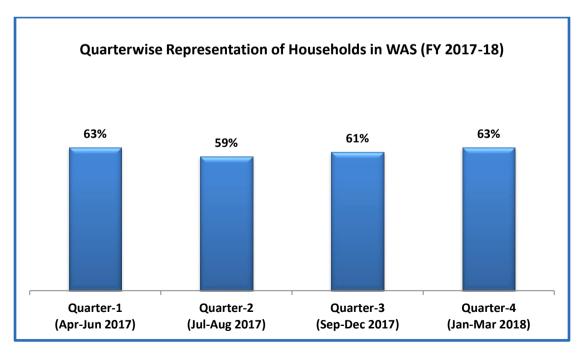

In the first and last quarters of the year, the representation of households in year 2017-18 is almost similar with little variation across different quarters. This points

towards constant interest of women in planning, evaluation and completion of works of their AWP. In the first quarter they had prepared their AWPs incorporating their remaining issues. The last quarter of the year was based on the progress of their works which were proposed in the AWP in the beginning of the financial year.

(ii) During third and fourth quarters of this financial year 2017-18, the participation and representation of households by women was, respectively, 59% and 61%. It indicates towards a healthy representation of households by women in the women Aam Sabhas organized for monitoring and evaluation of works under AWPs of their respective GPs across the four Divisions. However, marginally low attendance of women is WAS meetings had been on account of heavy rains during the monsoon season, as a result of which approach from one place to another becomes difficult to landslides and damaging of bridle paths. Thus, the representation of households by women has been recorded to be low during this period.

During winter season, the work load on account of agricultural activities remains low and thus, women can devote more time in organizing and attending Women Aam Sabhas and can concentrate on developmental activities during this period. During interaction with women during meetings and other visits, it is observed that they keep themselves well informed about the activities being undertaken and the works being implemented through the project under AWP. So the discussions were held in all GPs and Aam Sabhas meetings about the AWP's works, as such activities provide them with wage employment as well.

# (V) Vulnerable Individuals and Groups:

During this financial year (2017-18), total 609 Individual and 81 Group IGAs were supported under the project benefitting 1068 vulnerable households. A total of 1068 vulnerable individual beneficiaries were funded with Rs. 2,46,97,750 for establishing their IGAs during the year 2017- 2018. The progress against the Indicators of vulnerable groups and Individuals and their livelihood activities directly contributed to these Group and Individual incomes. The progress of Vulnerable Group and Individual activities undertaken during this fiscal and their cumulative progress has been described in detailed here.

### (i) Vulnerable Individuals:

With the view to increasing participation of vulnerable households in the implementation of Project, FNGO conducted meetings of vulnerable households at village level and motivated and mobilized them to take up Income Generating Activities (IGAs) for their social and economic upliftment across all the four Divisions of Garhwal region during the financial year 2017-18.

Consequent to Social Mobilization of vulnerable households, the FNGO team facilitated the process and identified and prepared proposals for 609 Vulnerable Individuals across all the four divisions against a target of 528 Vulnerable Individual beneficiaries. These Individual

beneficiaries are actively participating in other Project management activities. Division-wise details of Vulnerable Individual beneficiaries for the year are given below:

**Progress of vulnerable Individuals Financed 2017-18** 

SN	Division	Target of VIs for FY 2017-18	Total VIs funded during FY 2017-18	Target Achieved	Fund Granted (in Rs.)
1	PMU Model MWS, Raipur	30	51	170%	15,30,000
2	Pauri Division	123	127	103%	33,23,000
3	Tehri, Thatyur	200	223	112%	60,13,750
4	Dehradun, Vikasnagar	175	208	119%	62,40,000
	Total	528	609	115%	1,71,06,750

Achievement: This year the target under the Vulnerable Individuals for all the four Divisions was fixed at 528 for the year. In certain cases, it becomes a bit difficult to identify likeminded people to come together and form a group to take up IGA collectively. FNGO teams analyzed the ground realities of vulnerable households where people were hesitant to take up IGA collectively, it was found that the individual approach for taking up a venture was a good option for them. Therefore, the target of Individual beneficiaries was revised upward and 609 Vulnerable Individual beneficiaries were granted aid against 528 Individuals thus achieving a target of 115%. All the selected beneficiaries have received funding through their Gram Panchayats and have initiated their IGAs.

#### **Gender-wise Analysis of Vulnerable Individuals:**

Addressing gender in participation and decision making in Project planning and Implementation by the community is a key feature of the Project. Participation of vulnerable sections of the society, especially women in all project activities is mandatory. This year FNGO financed 609 Individual beneficiaries of which 237 were female beneficiaries from vulnerable households. The details of gender wise status of Vulnerable Individuals are given in the table below:

**Gender wise status of Vulnerable Individuals (FY2017-18)** 

SN	Division	Male		Fen	nale	Total 51 127 223
	Division	No.	%age	No.	%age	TOLAI
1	PMU Model MWS, Raipur	28	55%	23	45%	51
2	Pauri Division	88	69%	39	31%	127
3	Tehri, Thatyur	120	54%	103	46%	223
4	Dehradun, Vikasnagar	136	65%	72	35%	208
	Total	372	61%	237	39%	609

Achievement: The above table shows gender-wise analysis of vulnerable Individuals beneficiaries funded during the year for initiating their alternative income generating activity. It is a significant achievement that out of total beneficiaries across all the divisions 39% were poor women selected for being funded for establishing alternative livelihood for their families. Tehri division topping the list financed 103 poor women out of 237 vulnerable Individuals, which is 46% of the total beneficiaries and this is a remarkable achievement followed by 45% females in PMU, Raipur. Pauri Division, however, reported the lowest number of female beneficiaries with 31%. However, overall funding to 39% women beneficiaries points towards women empowerment through Gramya-II, whereby women have shown keen interest in initiating their own livelihood activities as individual beneficiaries.

#### **Sectoral Analysis of Vulnerable Individuals:**

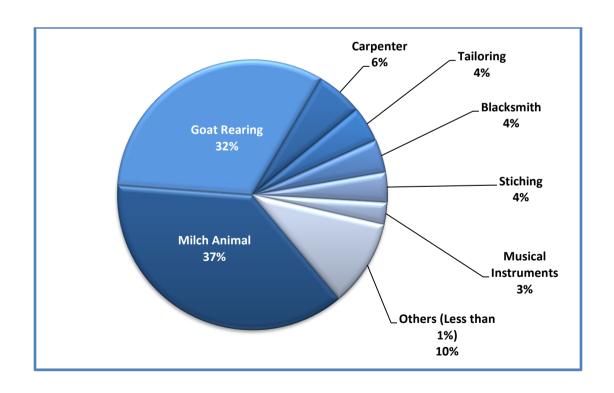

Going by sectoral progress of Vulnerable Individuals, 71.10% have opted for livestock activities for their alternative livelihood. These being the traditional activities for generating cash income, the people appear to show interest in these activities. The modern technical professions are in the lower strata of IGA sectors. However, other traditional professions, such as Carpenter, blacksmith, tailoring, etc. also has a good percentage of people showing their interest in opting for these skill based activities in different traditional livelihood activities. The sector-wise analysis of Vulnerable Individual activities are given in the Table-3 below:

#### Sector-wise Status of Vulnerable Individuals (FY 2017-18)

CN	Control leaves Consorting Anti-thics	Total VIs Funded		
SN	Sector wise Income Generating Activities	No.	%age

28	Tyre repairing	1	0.2%	
29	Videographer	1	0.2%	
	Sub-Total	37	6.07%	
	Total	609	100.0%	

# (ii) Vulnerable Groups

#### **Progress:**

Just as in case of Vulnerable Individuals, FNGO field team also mobilized the vulnerable households in the project area to take up group activities for their livelihood. Project has set the target of 168 Vulnerable Groups (VGs) across all the four Divisions.

FNGO teams discussed IGA options with vulnerable households in the project area. It was found that it is a bit difficult to identify likeminded people to form groups of vulnerable households to take up income generating activities collectively. However, the FNGO team made its best efforts in this direction motivating and mobilizing the eligible households to come together to establish collective business ventures. The success was achieved with the formation of 81 vulnerable groups against the annual target of 168, which falls much below the target. The details of vulnerable groups received funds under vulnerable group fund are given below:

Status of Fund Relased to Vulnerabel Groups for the Year 2017-18

SN	Division	Target of VGs for FY 2017-18	Total VGs funded during FY 2017-18	Target Achieved	Fund Granted (in Rs.)
1	PMU Model MWS, Raipur	13	1	8%	1,00,000
2	Pauri Division	4	3	75%	1,87,000
3	Tehri, Thatyur	78	23	29%	19,34,000
4	Dehradun, Vikasnagar	73	54	74%	53,70,000
	Total	168	81	48%	75,91,000

Achievements: The above table shows the progress and achievement against the funding of Vulnerable Groups during year 2017-18. The achievement against this component of the project is not very encouraging and shows only 48% achievement of target for the year. A funding of Rs. 75.91 lakh has been done for establishing alternative livelihood by the groups.

#### **Gender-wise Analysis:**

As enumerated earlier, the activities being implemented by Gramya-II show the w empowerment of women with more and more women coming forward to take up income generating activities either individually or collectively. As in the case of Vulnerable Individuals, women in Vulnerable Group activities have also shown remarkable turnout with 199 women participating in collective income venerating activities out of total 459 beneficiaries of vulnerable groups across four project divisions. Going by divisions, Pauri has topped the list of women participants in Vulnerable Group with 47% women members, following by 46% in Dehradun. Although the higher incidence of men migration in Pauri District could be one valid reason in case of women taking the lead in income generating activities. In Dehradun Division, the agriculture had been the major source of income of households but the scenario seems to have changed in the recent past with several families migrating to the plains in search of jobs and education for their children, thus weakening of interest in agriculture activities. Thus, several women seem to have come forward to take up alternative livelihood for generating cash income for their households. Catering and tent house are the major focus activities in case of groups ventures providing good source of livelihood of vulnerable women collectively. This has also helped the women to come over their hesitation in taking up alternative income generating activities. Details of gender-wise analysis across four Divisions of the Project are given in the table below:

#### Gender-wise analysis of Vulnerable Groups (FY 2017-18)

SN	District	Male		Female		Tabal
	Division	No.	%age	No.	%age	Total
1	PMU Model MWS, Raipur	3	60%	2	40%	5
2	Pauri Division	10	53%	9	47%	19
3	Tehri, Thatyur	98	61%	63	39%	161
4	Dehradun, Vikasnagar	149	54%	125	46%	274
	Total	260	57%	199	43%	459

#### Sectoral Analysis of Vulnerable Groups and their Participation in the Project:

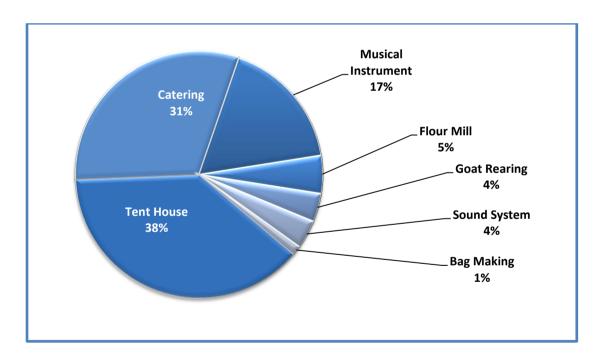

In case of activities initiated with project support from venerable grant fund by Vulnerable Groups in the project area, Tent House and Catering remains the activity of major choice by most of the groups with 37% and 31%, respectively opting for these activities. This is owing

to the absence of such facilities in the village locations and its potential during marriage season. This is followed by another preferred option of Band party and Dhol-Damau (local musical instruments), which again has a potential during marriage season, with 17% groups opting for the same. The details of sector-wise analysis of group IG Activities of this year (2017-18) have been given in table below:

SN	Income Consusting Astirities	Total VIs Funded		
SIN	Income Generating Activities	No.	%age	
1	Tent House	31	38%	
2	Catering	25	31%	
3	Musical Instrument (Vadhya Yantra/ Dhol Damau, etc.)	14	17%	
4	Flour Mill	4	5%	
5	Goat Rearing	3	4%	
6	Sound System	3	4%	
7	Bag Making	1	1%	
	Total	81	100%	

Detailed List of Vulnerable Individuals and Groups is given at Annexure 1A & 1B.

# (iii) Cumulative Progress of Vulnerable Individuals and Groups:

#### Socio-economic Profile of Households:

During last three years (from April 2015 to March 2018), Vulnerable Groups/Individuals have become a big economic force in the Project villages across the four project Divisions. According to the baseline information of PRA during planning phase and GPWDP of 201 GPs

of four Divisions, there are 18295 households in four Divisions. To assess the socio-economic status of these households, wealth ranking was done by the community members during PRA who categorized these households into three Income Groups, i.e. Higher Income Group (HIG), Middle Income Group (MIG) and Lower Income Group (LIG). The criteria for determination of the Income Groups was decided by the community and was village and locality specific

As a result of the Wealth Ranking in all the RVs (Revenue Villages) of 201 Gram Panchayats (GPs), 8019 households were found in Lower Income Group across all four Divisions, i.e., 2075 Pauri (40.17%), 3085 Tehri (43.68%), 2606 Dehradun (48.50%) and 253 PMU, Raipur (36.40%). In Dehradun Division, majority of households were living under poverty conditions whereas this figure was the lowest in case of PMU, Raipur.

Similarly, in case of Higher Income Group, PMU, Raipur at 24.46% households has the largest percentage of this category, with Tehri being the lowest with 17.68%. Whereas, Pauri and Dehradun Divisions have 19.49% and 19.44% higher groups households, respectively. The Middle Income Group stood at 37.12% in all the four divisions put together with 6792 households in this category. Details of three economic category of households across the four Divisions are given in the table below:

#### **Economic Profile of Households**

Division	Total HHs	Higher Income Group	%age of Group	Middle Income Group	%age of Group	Lower Income Group	%age of Group
Pauri	5165	1007	19.49	2083	40.32	2075	40.17
Tehri	7062	1249	17.68	2718	38.48	3085	43.68
Dehradun	5373	1048	19.44	1719	31.99	2606	48.50
PMU, Raipur	695	170	24.46	272	39.13	253	36.40
Total	18295	3474	18.99	6792	37.12	8019	43.83

#### **Overall Progress of Vulnerable Groups/Individuals:**

The main focus of the Project is on socio-economic upliftment of 8019 households which were identified in the Lower Income Group (LIG) under the Project through PRA across four Divisions during planning phase. Hence the, FNGO has focused its attention on involving these households in Income Generating Activities which are economically viable and locally feasible and also beneficial for their families. A total of 1194 Individual IGAs and 168 Group IGAs have been supported under the Project benefitting 2185 households. A total grant of Rs. 4,76,15,670.00 has been distributed to vulnerable households till 31<sup>st</sup> March 2018.

In case of Vulnerable Individuals, Rs. 3,22,34,770.00 has been invested on 1194 members by the end of March 2018, across all the Divisions. The average amount invested on each Individual beneficiary comes to Rs. 26,947.00 against which they have made an average case income of Rs. 9,398.00 during last two years. Although, some individual beneficiaries have been funded recently and their IGAs have not yet started generating income, although such beneficiaries have been taken into account while calculating the average income.

Similarly, in the case of 168 Group IGAs which were funded from the Project to the tune of Rs 1,5380,900.00 till March 2018 benefitting overall 991 members. The average income of their 991 members has come to Rs. 15,520.00 during the last two years as on 31<sup>st</sup> March 2018. As in the case of vulnerable individuals, some vulnerable groups have also received fund and have not initiated their IGA, but their name has been included while calculating the average income of vulnerable groups households. A brief income estimate of Vulnerable Group and Individual households during last two years (2016-2018) is given in the table below:

Status of Vulnerable Individuals funded & estimated Income up to March 2018

Division	Total no of HHs Benefitted	Total Funds Released (in Rs.)	Estimated Cash Income up to March 2018 (in Rs.)
Tehri	441	1,16,52,970	30,18,780
Pauri	248	68,14,800	41,47,720
Dehradun	382	1,00,77,000	29,36,347
PMU, Raipur	123	36,90,000	11,19,519
Total	1194	3,22,34,770	1,12,22,366

#### Status of Vulnerable Groups funded & estimated Income up to March 2018

Division	No. of Groups Benefitted	Total no of HHs benefitted	Total Funds released (in Rs.)	Estimated Income up to March 2018 (in Rs.)
Tehri	59	413	49,40,000	12,27,535
Pauri	13	79	9,20,900	5,65,438
Dehardun	82	429	81,20,000	4,82,832
PMU, Raipur	14	70	14,00,000	2,08,701
Total	168	991	1,53,80,900	24,84,506

# (VI) User Groups:

The project has a mechanism of maintaining the assets, mainly water structures, created under the project through a group of people enjoying the benefit of such assets. These groups are called User Groups, who collectively avail the benefits of these assets and

contribute financially to the corpus of their group towards user charges for maintenance of their assets for its longevity and sustainability. With a view to promoting the concept for maintenance and upkeep of assets created by the project in the villages, 120 User groups were formed during the financial year ending 31st March 2018 in addition to 143 groups formed till the previous year across all the four divisions. Apart from this, the Field team facilitated the process for opening of Bank Accounts of these User Groups and depositing of their contribution in the same. With dissolving of three User Groups for power tillers in Dehradun Division, 140 previously formed UGs are still operational across the 4 divisions.

#### **Formation of User Groups:**

In addition to those previously functional 140 User Groups across the four Divisions, 120 new User Groups have been formed during the year 2017-18 for maintenance and proper use of assets created under the financial year ending 31st March 2018. Thus, the total number of User Groups for under the project in four divisions of Garhwal Region has reached 260. Cumulative progress for formation of User Groups (Annexure-2) is given in the table below:

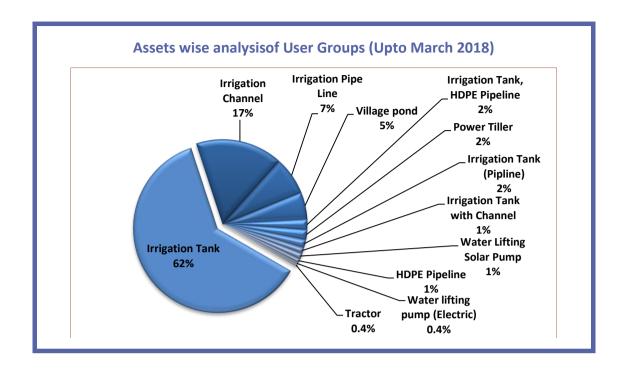

Division	Unit	User Groups Formed Till Mar. 2017	User Groups transferred to FIGs	User Groups Formed (FY 2017-18)	Cumulative Progress as on March 2017
PMU, Raipur	Thano	06	-	5	11
Total	1 Unit	06	-	5	11
	Kandalinadi	11	-	7	18
Pauri	Patisain	07	-	17	24
	Santoligad	06	-	9	15
Total	3 Units	24	-	33	57
	Kempty	04	-	7	11
Tehri, Thatyur	Nainbag	12	-	12	24
	Thatyur	17	-	39	56
Total	3 Units	33	-	58	91
	Chakrata	21	1*	1	21
Dehradun, Vikasnagar	Kwansi	31	1*	23	53
	Sahiya	28	1*	0	27
Total	3 Units	80	3	24	101
Grand Total	10 Units	143	3	120	260

<sup>\*</sup>Three power tillers provided to User Groups have been transferred to three FIGs and the User Groups formed for these power tillers have been dissolved. Thus, there are 140 previously formed groups left.

### **Activity wise analysis of User Groups**

Assets			Divisions		
Assets	Dehradun	Pauri	PMU Raipur	Tehri	Grand Total
HDPE Pipeline	0	0	2	0	2
Irrigation Channel	5	10	0	29	44
Irrigation Tank	82	21	2	57	162
Irrigation Tank with Channel	0	2	0	1	3
Irrigation Tank, HDPE Pipeline	0	0	5	0	5
Power Tiller	0	5	0	0	5
Tractor	0	1	0	0	1
Village pond	6	4	1	3	14
Water lifting pump (Electric)	0	1	0	0	1
Water Lifting Solar Pump	0	2	1	0	3
Irrigation Tank with Pipeline	8	3	0	1	12
Irrigation Pipeline	0	8	0	3	11
Grand Total	101	57	11	94	263

### **Joint Accounts Opened:**

As stated earlier, the User Groups formed for use and maintenance of community assets are motivated by the FNGO field staff for making their contribution into their group's corpus fund and ensure that the same is deposited into the bank accounts opened for the purpose. To ensure this, total 189 bank accounts have been opened with regard to the User Groups formed till 31st March 2018. The Unit-wise details of bank accounts opened and the contributions made therein, are given in the table below.

		9	Status upto March 2018	3
Division	Unit	No. of UGs Opened Bank Account	No. of UGs Depositing Amount	Amount Deposited in Account (in Rs.)
PMU, Raipur	Thano	9	9	46,400
Total	1 Unit	9	9	46,400
	Kandalinadi	15	15	46,216
Pauri	Patisain	19	19	1,16,167
	Santoligad	9	9	50,043
Total	3 Units	43	43	2,12,426
	Kempty	2	2	1,000
Tehri, Thatyur	Nainbag	13	13	27,800
	Thatyur	21	21	65,250
Total	3 Units	36	36	94,050
	Chakrata	21	21	12,600
Dehradun, Vikasnagar	Kwansi	53	53	50,300
	Sahiya	27	27	36,100
Total	3 Units	101	101	99,000
Grand Total	10 Units	189	189	4,51,876

From the table, it can be seen that total Rs. 4,51,876.00 have been deposited into User Group accounts till financial year ending 31st March 2018 with Pauri Division topping the list with Rs. 2,12,426.00. The details have given as follows:

## (VII) SOCIAL AUDIT - Participatory Monitoring & Evaluation

Uttarakhand Decentralized Watershed Development Project, Phase-2 being a community demand driven Project is implemented by Gram Panchayats, with due involvement of local communities in planning and implementation of the Project. The FNGO supports in preparation of Gram Panchayat Watershed Development Plan (GPWDP) through bottom up approach of planning and with active participation of stakeholders in their respect GPWDP planning and implementation. The Project is administered and implementing by the Gram Panchayats. Therefore, it becomes mandatory to involve wider range of stakeholders at micro level for Monitoring and Evaluation of project through a more participatory approach.

PME is an effective tool in assessement of change brought about by implementation of Project activities and is intended at involving village community in this process. Conventionally, this process was done by usually external experts in the project against set indicators. But in adoption of a complete participatory approach, this process has been been introduced for complete community involvement for tracking, monitoring and evaluating the project activities. Participatory Monitoring & Evaluation (PME) is the process of social audit,

which involves project beneficiaries and other stakeholders in the monitoring and evaluation of the project. The process is aimed at assessing that the planned interventions have been executed in line with the intended objectives.

#### **Review of Performance of PME Teams:**

PME teams played an active role in successful organization of PME in all the 201 GPs across the four Divisions. Before initiation of Round-2 of the PME, the performance of previously formed PME team was reviewed by the FNGO and MDT members. The performance was based on their full involvement in conduction of PME Round -1. After serious discussion on the involvement of PME team members in monitoring and evaluation of Project works. The conclusion of the discussion was to retain all members for PME Round -2 and no changes were made in the PME teams. Since, the PME team members who had been involved earlier in Round-1 of PME had experience, their experience could help in tracking the progress of works done under the AWP of the GP. After review of the progress of PME teams, the details of existing PME teams are as follows:

#### **Status of PME Teams in four Divisions**

CN	Division.	11	Total No.	No. of PME T	eams formed
SN	Division	Unit	of GP	Nos.	Achievement
1	PMU Raipur	Thano	7	7	100%
	Total		7	7	100%
		Patisain	21	21	100%
2	Pauri	Santoligad	25	25	100%
		Kandalinadi	16	16	100%
	Total		62	62	100%
		Thatyur	30	30	100%
3	Tehri (Thatyur)	Kempty	19	19	100%
		Nainbag	29	29	100%
	Total		78	78	100%
		Sahiya	20	20	100%
4	Dehradun (Vikasnagar)	Chakrata	18	18	100%
	(vinasiiagai)	Kwansi	16	16	100%
	Total		54	54	100%
	Grand Total		201	201	100%

#### **Period of PME Round-2:**

PME Round-2 was initiated from May 2017 and completed in March 2018 in 200 GPs across the four Divisions. First PME of Round-2 was held in Gram Panchayat Moldhar on 19<sup>th</sup> May 2017 and which was completed on 16<sup>th</sup> March 2018 with the last PME being held in Gram

Panchayat Thanta in Chakrata unit of Dehradun Division. One Gram Panchayat Jogio of Chakrata unit could not conduct the PME Round -2 due to dispute amongst the community.

### **PME Methodology:**

Before initiation of PME process in each GP, Gram Pradhans presented the records of GPs in front of Gram Sabha for their inspection. The Account Assistants of each Gram Panchayat presented the progress of works undertaken against the AWPs during last quarter of PME Round -1 along with Audit report for the financial year 2016-17. Thereafter, the records regarding Project GPs were presented by Account Assistants who explained the importance of each documents of Gram Panchayat being maintained by them. Formats R-1 and R-2 were shown by the Accounts Assistant and their utility was explained. R-1 is a broad report of the Activity-wise monthly abstract of expenditure based on Integrated Activity Register, whereas R-2 is a monthly Beneficiary Contribution Statement. It is based on Beneficiary Contribution Register of the Gram Panchayat. Project Cash Book, Bank Pass Books, Sanction Registers, etc. were displayed of community consideration.

### **Principle of PME Round 2:**

The PME Teams, FNGO and MDTs discussed the principles of this phase of PME in all four Divisions for the clarity of PME teams. It was a unanimous decision of all the Facilitators to be interactive with the stakeholders as well as beneficiaries regarding adoption of new techniques and technologies demonstrated by the Project. Secondly, the teams were realistic in term of budget, time and quality of work. Besides these principles, PME teams were focused on relevancy of activities for stakeholder's such as trainings, exposure visits and workshops, which were found effective in developing capacities of stakeholders. After that, PME process was initiated by adopting the following steps for monitoring and evaluation of AWP' works:

- Discussions held with PME Team members about their expectations from PME: The
  members obtained the list of activities under their AWP which were completed by the
  GP till the date of PME:
- Setting Priorities for PME: Clear cut instructions were given to all the members who
  participated in the PME process for check the progress of activity, quality of work,
  payment of works, benefits from the activity to beneficiary, etc. PME teams inspected
  and reviewed the progress of activities like plantation, soil conservation measures, use
  of compost pits, animal mangers, animal shelters, poly-house, IGA of Vulnerable

Individuals and Groups, rural road and bridal paths, distribution of seeds to the FIGs and production etc., were checked by the PME teams along with community members.

- Information on Identified Indicators: Apart from that it was decided that the information should be collected on the awareness of community regarding PRA and planning of GPWDP; ESMF integration in Project interventions; participation of women in Gram Sabha meetings and meetings conducted for Sabhas; budget capital; budget of AWP of the current year; grievances redressal and dispute settlement and level of transparency maintained by WWMC, RVC, Unit Officer and Village In-charge, etc.
- Reaching Consensus on PME Methodology: It was decided that both qualitative and quantitative methods will be applied to collect data and information on project works and activities. Teams paid visit to the activity sites and physically verified them as to their measurement and quaity of work. At some of the places they used participatory methods like review of activity records and found that they were maintained by the beneficiaries with the support of Facilitators and Motivators. Semi structure interviews of some beneficiaries were conducted on production of vegetables; use of irrigation water, deposit of user charges contribution, etc., which was found satisfactory in majority of GPs. In case of disprepencies, corrective measures were discussed at the community level PME meetings for further action. Assessment was made on infromation regarding Project objectives, activities and quality of works with the help of ballot box exercise in maximum number of GPs and information about the quality of activities was gather through rating by the community.

In various GPs, SWOT analysis was conducted in case of some of the activities like income generation by Vulnerable Individuals and Groups, most of which were fund to be upto the mark. However, corrective measures were suggested in case of some of he activities were discrepencies were observed. During these PME meetings, impacts of some success stories were discussed with the participants.

 Analyzing Information: After collection of data and information from the stakeholder during PME process, data and information were analyzed by the FNGO team and PME teams. Reports of each GP's PME have been prepared and presented to their respective Divisions for use of its findings and correction measures for improving the status of works and activities.

# **Progress of PME:**

Second round of Participatory Monitoring and Evaluation (PME) was initiated from May 2017 onwards and completed in March 2018. During this period, PME meetings were

conducted in 200 GPs across four Divisions of Garhwal region like Pauri, Tehri, Dehradun and PMU, MMWS, Raipur. Disputes in several GPs of Dehradun and Tehri Divisions was settled by village community, MDT and FNGO teams. Obstacles and hurdles created amongst village communities in implementation of project activities were revolved by devoting extra time. Details of Round-2 of PMEs conducted across four divisions of the project are given in the table below:

			Progres	ss of PME Ro	und-II in all D	ivisions		
Division	Total GPs	Yea	Half of ar 3 ct. 2017)	Yea	Half of ar 3 -Mar 2018	Grand Total (FY2017-18)		
		No.	%age	No.	%age	No.	%age	
PMU (MWS), Raipur	7	7	100%	0	0	7	100%	
Pauri	62	61	98%	1	2%	62	100%	
Tehri	78	54	69%	24	31%	78	100%	
Dehradun	54	46	85%	7	13%	53	98%	
Grand Total	201	168	83%	32	16%	200	99%	

### **Sharing PME Outcomes:**

Village community controlled the process for conduction of PME at GP level and result of the PME activities of entire GPs were discussed with the concerned authorities by FNGO. Apart from this, the teams were engaged in identification of corrective measures for different activities which were implemented by the GPs till the date of PME. It was also observed that the PME teams were active in entire project GPs, and focused on quality of works done under their AWPs. After preparing the PME reports, the teams jointly agreed to share the results of PME with their respective DPDs for taking necessary action wherever required.

# PROGRESS OF PME V/S ACHIEVEMENT OF INDICATORS (PME Round-2)

# **Representation of Households:**

- In PMU, Raipur out of 695 households, 379 households attended PME, which is 55% of total households.
- The representation of households in Pauri Division was 3084 out of 5165 which is 60% of the total households.
- Similarly, in case of Tehri Division, there are total 7062 households of which 4465 attended PME meetings, which is 63% of total households.

- In Dehradun Division 3269 households out of total 5151 were represented by at least one member in the PME process, which 63% of the total households.
- Thus, the overall participation of households in Round-2 of the PME was 62% across all the four Divisions.

### Wealth Ranking-wise Participation of Households

#### PMU, Raipur

Going by wealth Ranking-wise participation of households, out of total 371 participants attending PME in PMU Raipur, 96 were from Group 'A', 169 from Group 'B' and 165 from Group 'C' of wealth ranking, which is respectively, 22%, 39% and 38% of the total participants attending PME in PMU, Raipur.

#### **Pauri Division**

The PME meetings in Pauri Division were attended by 3166 participants which comprised 684 participants from Group 'A, 1294 from Group 'B' and 1188 from Group 'C', which is 22%, 41% and 38% representation of households respectively from Group A, B and C of wealth ranking.

#### **Tehri Division**

In case of Tehri Division, PME meetings were attended by total 5033 participants, that is 1292 participants from Group 'A', 1775 from Group 'B' and 1966 from Group 'C', which is respectively 26%, 35% and 39% representation of total participants attending PME meetings in the division.

#### **Dehradun Division**

In Dehradun Division total 3836 villagers participated in the PME exercise, of which 870 participants were from Group 'A', 1393 participants from Group 'B' and 1573 participants from Group 'C' of wealth ranking, which is 23%, 36% and 41% representation respectively from Group A, B and C category of households.

Thus, going by wealth ranking, the overall participation of villagers in all the four Divisions of Garhwal Region was 24% of participants from Group 'A'; 37% from Group 'B' and 39% from Group 'C' category of households.

# **Gender-wise Analysis of PME Participants**

Gender wise analysis of PME participants indicates increasing interest being shown by women folk in the project activities. In **PMU**, **Raipur** out of 430 participants attending PME

meetings, 215 were male and 215 females, which is 50% attendance by male and female participants going by the overall participation in PME meetings in the division.

In **Pauri Division** total 3166 villagers participated in the first round of PME meetings. Out of this, 788 were male and 2378 were female participants, which is an encouraging 75% participation by women in PME meetings, whereas male formed only 25% of the total participants attending PME meetings in the Division.

In **Tehri Division**, total 5033 villagers participated in the first round PME exercise, of which 2449 were male and 2584 were female participants. Thus, the participation of male and female participants in the PME meetings in the division was 49% and 51%, respectively.

Similarly, in **Dehradun Division**, PME meetings were attended by 3836 participants out of which 1771 were male and 2065 were female participants. Thus, gender wise representation of male and female in the PME meetings was 46% male and 54% female participants

The overall gender wise participation of villagers in PME meetings was 42% male and 58% of female participants across all the four Divisions. Thus, women participation is higher than their male counterparts, which is a good indicator of women empowerment.

Analysis of other key indicators of PME is as follows:

### 1. Awareness on Community Mobilization and Watershed Planning

Under this indicator of PME, assessment was made as to the awareness of villagers on different aspects of the project, i.e., PRA exercises conducted for GPWDP preparation; villagers' participation in the PRA exercises; selection of beneficiaries for various project related activities and incorporation of activities in the GPWDP after screening through Environmental and Social Management Framework (ESMF). The responses given by the villagers during PME in their respective GPs; have been analyzed in tables 1.1, 1.2, 1.3 & 1.4 below: -

Table 1.1: Awareness on Organization of PRA for GPWDP Preparation

	М	ale Participants	3	Fer	nale Participar	nts	Total			
Division	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participants saying Yes	%age	
PMU, Raipur	215	215	100%	215	215	100%	430	430	100%	
Pauri	788	698	89%	2378	2219	93%	3166	2917	92%	
Tehri	2449	2380	97%	2584	2521	98%	5033	4901	97%	
Dehradun	1771	1640	93%	2065	1878	91%	3836	3518	92%	
Total	5223	4933	94%	7242	6833	94%	12465	11766	94%	

Ongoing through the table 1.1 above, it is observed that the awareness level of male and female participants on Organization of PRA for preparation of GPWDP is almost at par across all the four divisions. Overall awareness among male and female participants on this component of the project at 94% is guite satisfactory.

Table 1.2: Awareness on Participation in PRA Exercise for GPWDP Preparation

	M	ale Participants	Fei	male Participar	nts	Total			
Division	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participants saying Yes	%age
PMU, Raipur	215	213	99%	215	209	97%	430	422	98%
Pauri	788	689	87%	2378	2212	93%	3166	2901	92%
Tehri	2449	2344	96%	2584	2499	97%	5033	4843	96%
Dehradun	1771	1629	92%	2065	1868	90%	3836	3497	91%
Total	5223	4875	93%	7242	6788	94%	12465	11663	94%

An analysis of the above data indicates almost the same level of awareness in male and female participants with 94% overall awareness on participation in PRA, which is also quite satisfactory.

Table 1.3: Awareness on Beneficiary Selection and Various GPWDP Activities

	M	lale Participants	i	Fen	nale Participar	nts	Total			
Division	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participants saying Yes	%age	
PMU, Raipur	215	212	99%	215	212	99%	430	424	99%	
Pauri	788	701	89%	2378	2216	93%	3166	2917	92%	
Tehri	2449	2385	97%	2584	2515	97%	5033	4900	97%	
Dehradun	1771	1633	92%	2065	1850	90%	3836	3483	91%	
Total	5223	4931	94%	7242	6793	94%	12465	11724	94%	

An analysis of the above data indicates marginally higher level of male participation on the procedure adopted for selection of beneficiaries of project activities. However, the overall 94% participants being aware above this component of the project is quite satisfactory and indicates towards increased interest of women in project activities.

Table 1.4: Awareness about GPWDP activities screened through ESMF

	Male Participants			Fen	nale Participar	nts	Total			
Division	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participant s saying Yes	%age	Total (n)	No. of Participants saying Yes	%age	
PMU, Raipur	215	215	100%	215	215	100%	430	430	100%	
Pauri	788	690	88%	2378	2165	91%	3166	2855	90%	

	М	ale Participants	Fen	nale Participar	nts	Total			
Division	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participant s saying Yes	%age	Total (n)	No. of Participants saying Yes	%age
Tehri	2449	2404	98%	2584	2517	97%	5033	4921	98%
Dehradun	1771	1621	92%	2065	1829	89%	3836	3450	90%
Total	5223	4930	94%	7242	6726	93%	12465	11656	94%

An analysis of the data above shows overall 94% awareness on screening of GPWDP activities on the basis of ESMF guidelines. Interestingly, overall male and female awareness across four divisions on this count was equal. In case of Pauri Division, female awareness under this head was higher than that of female. However, similar level of awareness among male and female indicates towards increasing information level of women in project activities.

### 2. Inclusiveness and Equity:

Table 2.1: Justification of Beneficiary Selection during GPWDP Preparation

	Ma	le Participants		Fema	ale Participant	:s	Total			
Division	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participants saying Yes	%age	
PMU, Raipur	215	211	98%	215	212	99%	430	423	98%	
Pauri	788	734	93%	2378	2254	95%	3166	2988	94%	
Tehri	2449	2436	99%	2584	2527	98%	5033	4963	99%	
Dehradun	1771	1669	94%	2065	1882	91%	3836	3551	93%	
Total	5223	5050	97%	7242	6875	95%	12465	11925	96%	

On the question of justification of beneficiary selection during GPWDP preparation, 97% of male and 95% of female participants responded in affirmative. In this case also, the level of both female and male participants was reported at par, which is again as good indicator of women empowerment through Gramya-II efforts.

**Table 2.2: Organization of WAS Prior to GPWDP Preparation** 

	Ma	le Participants	;	Fema	ale Participant	is	Total			
Division	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participants saying Yes	%age	
PMU, Raipur	215	215	100%	215	215	100%	430	430	100%	
Pauri	788	729	93%	2378	2339	98%	3166	3068	97%	
Tehri	2449	2347	96%	2584	2555	99%	5033	4902	97%	
Dehradun	1771	1682	95%	2065	1937	94%	3836	3619	94%	
Total	5223	4973	95%	7242	7046	97%	12465	12019	96%	

During PME, the participants' awareness as to the organization of WAS prior to GPWDP preparation was made, to which 95% male and 97% female participants replied in affirmative. In this case also, the awareness level of women was seen to be higher than their male counterparts.

Table 2.3: Ensuring Selection of SC/ST/Widow/Divyang as Project Beneficiaries

	Ma	le Participants	3	Fema	ale Participant	is	Total			
Division	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participants saying Yes	%age	Total (n)	No. of Participants saying Yes	%age	
PMU, Raipur	215	215	100%	215	215	100%	430	430	100%	
Pauri	788	738	94%	2378	2321	98%	3166	3059	97%	
Tehri	2449	2425	99%	2584	2549	99%	5033	4974	99%	
Dehradun	1771	1680	95%	2065	1922	93%	3836	3602	94%	
Total	5223	5058	97%	7242	7007	97%	12465	12065	97%	

An analysis of the data shows almost equal percentage of male and female participants replying in affirmative. Overall 95% of participants agreed to transparency being maintained in the selection of beneficiaries from vulnerable and under-privileged sections of the society.

**Table 2.4: Employment Generation through Project Activities** 

Division	Total No of mandays generated up to 31 <sup>st</sup> March 2018
PMU, Raipur	36,288
Pauri	1,39,563
Tehri	74,741
Dehradun	1,30,107
Total	3,80,699

Analysis of the above table shows generation of total 3,80,699 mandays from project activities in various GPs across all the four divisions of the project.

### 3. Transparency and Accountability:

**Table 3.1: Information Sharing of Project Funds** 

SN	Division	Total	No. of Participants saying Yes				
314	Bivision	(n)	No.	%age			
1	PMU, Raipur	430	390	91%			
2	Pauri	3166	2884	91%			
3	Tehri	5033	4758	95%			
4	Dehradun	3836	3342	87%			
	Total	12465	11374	91%			

A look at the above table shows 91% percent of respondents replying in affirmative as to the issue of Information Sharing about Project funds. The overall affirmative response is satisfactory, although more focus needs to be laid on this count.

Table 3.2: Awareness on Display of Information

SN	Division	Total	No. of Participants saying Yes				
		(n)	No.	%age			
1	PMU, Raipur	430	403	94%			
2	Pauri	3166	2952	93%			
3	Tehri	5033	4863	97%			
4	Dehradun	3836	3422	89%			
	Total	12465	11640	93%			

The awareness level of participants on display of project/activity related information was checked during PME meetings. In this case also, the awareness level of participants was reported to be quite satisfactory with 93% participants claiming awareness about the same.

Table 3.3: Awareness on Display in GP of Information on Status of Expenditure

SN	Division	Total	No. of Participants saying Yes				
		(n)	No.	%age			
1	PMU, Raipur	430	379	88%			
2	Pauri	3166	2868	91%			
3	Tehri	5033	4362	87%			
4	Dehradun	3836	3328	87%			
	Total	12465	10937	88%			

Participants during PME meetings were questioned on the issue of their level of awareness on display of information on status of expenditure regarding project related activities. Overall 88% of PME participants across all the four divisions reported that the same is displayed.

Table 3.4: Awareness on Place of Displayed Information

SN	Division	Total	No. of Participants saying Yes				
		(n)	No.	%age			
1	PMU, Raipur	430	419	97%			
2	Pauri	3166	2940	93%			
3	Tehri	5033	4717	94%			
4	Dehradun	3836	3391	88%			
	Total	12465	11467	92%			

Response on this component is quite satisfactory with overall 92% of participants having information as to the place of display of information regarding project activities.

Table 3.5: Maintenance of Transparency by WWMC/RVC/MDT

SN	Division	Total	No. of Participants saying Yes					
		(n)	No.	%age				
1	PMU, Raipur	430	427	99%				
2	Pauri	3166	2891	91%				
3	Tehri	5033	4904	97%				
4	Dehradun	3836	3430	89%				
	Total	12465	11652	93%				

`Table 3.5 above relates to the information of PME participants on the issue of maintenance of transparency by WWMC/RVC/MDT in project related activities. Overall 93% of participants across all the four divisions replied in affirmative and agreed that transparency with regard to project related activities is maintained by WWMC/RVC/MDT.

Table 3.6: Timely payment of Works under GPWDP

			No. of Participants saying Yes							
SN	Division	Total (n)	R\	/C	User (	Group	Vulnerable Group			
		(,	No.	No. %age		%age	No.	%age		
1	PMU, Raipur	430	430	100%	430	100%	430	100%		
2	Pauri	3166	3015	95%	2101	66%	2692	85%		
3	Tehri	5033	4965	99%	3221	64%	4773	95%		
4	Dehradun	3836	3515	92%	3393	88%	3638	95%		
Total		12465	11925	96%	9145	73%	11533	93%		

Regarding timely release of payment, similar situation emerged with 93% respondents agreed to timely release of payment in Pauri Division with respect to works under GPWDP. However, in Dehradun Division only 85% responded in affirmative on the issue of timely payment of works under GPWDP.

### 4. Financial Management:

**Table 4.1: Scrutiny of Documents** 

			Response in Affirmative

In response to the issue for Scrutiny of Documents, the participants were questioned as to their perception on this issue. The responses of participants presented a healthy picture on the same with a good number of them replying in affirmative. The respondents replying in affirmative for different types of documents varied between as low as 81% in case of stock register and as high as 94% in case of documents such as RI, R2 and cash book.

### 5. Knowledge Management and Dissemination:

Table 5.1: Technological Improvement in Traditional Occupations of Vulnerable Individuals and Groups

SN	Division	Total	No. of Participants saying Yes				
SIN	Division	(n)	No.	%age			
1	PMU, Raipur	430	425	99%			
2	Pauri	auri 3166		85%			
3	Tehri	5033	4781	95%			
4	Dehradun	3836	3673	96%			
	Total	12465	11565	93%			

Responses of participants on the issue of Technological Improvement in Traditional Occupations of VIs & VGs presented a satisfactory picture across four divisions, with PMU Raipur topping the list with 99% responses in affirmative following by Dehradun (96%) and Tehri (95%). However, in case of Pauri Division only 85% replied in affirmative.

Table 5.2: Income enhancement due to technological advancement of Vulnerable **Individuals and Groups** 

SN	Division	Total	No. of Participants saying Yes				
SIN	Division	(n)	No.	%age			
1	PMU, Raipur	430	426	99%			
2	Pauri	3166	2768	87%			
3	Tehri	5033	4747	94%			
4	Dehradun	3836	3576	93%			
	Total	12465	11517	92%			

Overall 92% respondents agreed that technological advancement as a result of project interventions has enhanced their incomes. A good number of 99% in PMU agreed to enhancement of their income on account of technological advancement, following by Tehri (94%) and Dehradun (93%). Again, Pauri Division was a laggard on the issue with 87% replying in affirmative on this issue.

Table 5.3: Increase in productivity due to Technical Training on Agri/Horti/Animal **Husbandry & Exposure Tours** 

SN	Division	Total	No. of Participants saying Yes			
		(n)	No.	%age		
1	PMU, Raipur	430	427	99%		
2	Pauri	3166	2907	92%		
3	Tehri	5033	4268	85%		
4	Dehradun	3836	3493	91%		
Total		12465	11095	89%		

A healthy 89% respondents overall agreed that trainings on Agriculture, Horticulture, Animal Husbandry and related exposure tours have been useful in increasing their productivity in the related field, which is a good sign and calls for greater attention.

### 6. Performance of Committees and Groups:

As to the performance of committees and groups like VGs, UGs, RVCs and FIGs formed in all the four Divisions, villagers agreed to their performing properly as per the expectations. This is due to the fact that almost all the VGs and VIs across all the four Divisions are engaged in income generating activities of their choice. The UGs formed in all the Divisions are taking benefit of assets created under the project and have opened their Bank accounts to ensure sustainability of assets. Similarly, some of the FIGs of the project are engaged in useful Income Generating Activities and producing and selling their products with little project support. FIGs in Dehradun Division of Vikasnagar are also engaged in promoting savings and maintenance of accounts to enhance their enterprise.

# 7. Inputs/Support by MDT:

Table 7.1: Technical Assistance by Village-Incharge

SN	Division	Total (n)	Always		Sometime		Never	
			No.	%age	No.	%age	No.	%age
1	PMU, Raipur	430	430	100%	0	0%	0	0%
2	Pauri	3166	3024	96%	142	4%	0	0%
3	Tehri	5033	4592	91%	441	9%	0	0%
4	Dehradun	3836	3579	93%	234	6%	23	1%
Total		12465	11625	93%	817	7%	23	0%

On analysis of the data as to the support provided by MDT members and technical assistance of Village Incharge, villagers seemed quite positive and overall 93% responded to be always receiving full cooperation from these sources across all the four Divisions.

Table 7.2: Assistance by Motivators/Facilitators/Coordinators

SN	Division	Total (n)	Always		Sometime		Never	
			No.	%age	No.	%age	No.	%age
1	PMU, Raipur	430	430	100%	0	0%	0	0%
2	Pauri	3166	3038	96%	128	4%	0	0%
3	Tehri	5033	4994	99%	38	1%	1	0%
4	Dehradun	3836	3608	94%	226	6%	2	0%
Total		12465	12070	97%	392	3%	3	0%

As to the issue of receiving assistance from Motivators, Facilitators and Coordinators, the table shows that overall 97% respondents replied in affirmative and agreed that they always receive complete technical assistance from Motivators, Facilitators and Coordinators.

Table 7.3: Technical Assistance by Unit In-charge

SN	Division	Total (n)	Always		Sometime		Never	
			No.	%age	No.	%age	No.	%age
1	PMU, Raipur	430	430	100%	0	0%	0	0%
2	Pauri	3166	3018	95%	148	5%	0	0%
3	Tehri	5033	4207	84%	826	16%	0	0%
4	Dehradun	3836	3607	94%	227	6%	2	0%
Total		12465	11262	90%	1201	10%	2	0%

Responses on the issue of receiving technical assistance by the Unit In-charge was also well taken with overall 90% respondents agreeing that they always receive technical assistance of the Unit In-charge.

# **FNGO Assistance** in Other Activities

# (I) Assisting Trainings & Workshop at Unit Level

#### **Pauri Division**

- In the month of July 2017, Skill Development training on preparation of pickles, jam, squash, etc. was organized in villages Bhedgaon, Koyal gaon, Sanglakoti, Simi, Borgaon, Kanoth, Saknoli and Matgal of Unit Kandalinadi. The one-day training programme was attended by 271 participants across the above mentioned villages.
- Training on Fruit Preservation and Fruit Processing was provided through the Project to various women in different units of the division during quarter ending March 2018.
- Santoligaad unit imparted one day training to villagers where they learnted about the process for making pumpkin pickle and Malta Juice.
- Training on making Ringal and bamboo baskets and other items was also provided to the women to enable them adopt the same for their livelihood.
- Training was imparted in March 2018 on preparation and use of vermi compost in villages Gadari, Dweela Talla, Palidhaar and Salan of Santoligad Unit. Trainer provided information to villagers on preparation of Vermi compost and motivated them on reducing the use of chemical fertilizers. In village Dweela Talla and Palidhaar, training was imparted on Pine briquetting. Villagers learned about preparing coal from pine needles which can be helpful in reducing the menace of pine needles and at the same time enhance their family income.

In Kandali Nadi unit, villages Veenagaad, Veena Malli, Pokhda, Naukholi, Devradi, Talli, Malli, Melgaon were covered under the fruit processing trainings where villagers learned

simple techniques on pickle, juice, jam and jelly making. Apart from these skills, trainer also provided simple tips on Mushroom cultivation.

#### **Tehri Division**

- Shree Manav Kalyan Samiti, Dehradun imparted training on Pickle Making and Fruit Processing in various villages of Kempty, Nainbag and Thatyur Units.
- Training on making Ringal and bamboo baskets and other items was also provided to the women to enable them adopt the same for their livelihood.
- Training was conducted in villages of Kempty Unit on preparation of Namkeen and spices using various local products. The training was imparted by SIDH.
- An in-house training on scientific method of vegetable seed sowing was organized in villages of Nainbag unit wherein the training was imparted by ABSO experts or farming of tomato, cucumber, brinjal, beans and beetroot, etc.

#### **Dehradun Division**

- Three Days training of FIG members was organized at Kwansi Unit from 14<sup>th</sup>-16<sup>th</sup>
   January 2018 to provide training on agricultural activities and preparation of organic compost and its uses.
- Two-Days Division Level training for FIG members was organized at Vikasnagar on 29th-30th January 2018 with focus on orchard development and organic farming.
- Training on Bamboo Craft was organized in Chakrata Unit of the Division wherein the training was imparted to 32 participants.
- Training in Kwansi unit villages was provided on preservation and utilization of surplus fruits and vegetables for preparation of pickles, sauce, squash, etc. The training was imparted by Shri Manav Kalyan Samiti.
- · A three-days Divisional level training on Orchard Development was organized for the

- participants from selected villages of Kunna, Lakhamandal, Dharya, Sidibadkoti and Punahpokhri.
- Kwansi unit of the Division conducted training programmes for local women of village Kandoi Bondur, Chhultad, Lakha Mandal, Dhaura Pudiya, Kandidhaar, Birpa, Meghad, Bijanu, Chunauti and Sidi-Barkoti of the Division. The training was imparted by "Shri Manav Kalyan Samiti", Dehradun. During the training, women learned to make the followings items ...
  - a. Pumpkin Sauce
  - **Tomato Puree**
  - **Tomato Sauce** c.
  - d. Ginger and Garlic Pickle, etc.

- Village level trainings were imparted in Kunna, Myunda, Kandoi Bondur, Chhultad, Kandichamagatha, Cidi Barkoti, Birpa, Punah-Pokhari and Rangeu villages during the month of March 2018. During these trainings, villagers learned the process for making Rhododendron Juice (Burans) and pickles. After completion of the training the villagers prepared 177 liters of Rhododendron Juice which is sold @ Rs. 60.00 per liter.
- Apart from this, training was imparted on Bamboo Craft in village Khatwa, Kharsi, Manwa, Birpa and Kandidhaar of Kwansi Unit of the Division.
- Six days' training programme on candle making was conducted in village Haripur, Vyasnahari, Vyasbhud, Tilwadi, Kalsi and Chapnu.

## PMU (MWS), Raipur

Trainings were organized in PMU division in January 2018 where the Livestock Officer, Agriculture Extension Officer and President of Nagtibba imparted training on various agriculture and animal husbandry related activities.

- A One-day training programme was organized for FIG members on 12th February 2018 at Unit Office, Thano. Objective of the training was to provide information regarding formation of Federation of Farmers' FIGs.
- A Three-day Division level training on fruit preservation was organized from 26th-28th February, 2018 which was attended by 25 women participants who were imparted training on pickle, juice & murabba by processing lemon, mango, Amla, ginger, chili and garlic. The training was imparted by HIT Samiti, Mothorowala.
- During the month of March 2018, a one-day training programme was organized for FIG members in villages Tangoligarh, Dharkot, Kairwan, Jakar, Farti, Sindhwalgaon, Kaknawa, Thano on organic farming. The Trainer in the training laid emphasis on cultivation of ginger, tomato and vegetables. He also encouraged participants to grow Marry Gold flowers on the border of their fields. This will protect the crops from insects. Apart from this, the trainer also taught simple method for making vermi compost.

# (II) World Bank Mission:

#### **Tehri Division, Thatyur**

### Pre Lunch on 4th May, 2017

In the beginning of this month the World Bank Supervision Mission, visited the site of Gram Panchayats Bhatoli and Sainji in Rigali Gad MWS. The Mission held discussions with the villagers in Bhatoli on May 4, 2017. A community wide meeting was organized and several questions were asked by the Mission on existing economic livelihood model of the

villagers. After meeting with the villagers, the Mission visited the sites of various works carried out by the Gram Panchayat.

#### Post Lunch on 4th May, 2017

After visiting the sites and discussions with the community, the next meeting was held at GP Sainji of Kempty unit, where the team visited the work sites and held discussions with the community.

### **Dehradun Division, Vikasnagar**

#### **Climate Smart Agriculture Team's Visited**

During the month of April 2017, World Bank Mission, Climate Change and Smart Agriculture Team visited the village Dudhau of Gram Panchayat Bansar under the guidance of Prof. Ravindra Nath and Dr. Indu. During the visit in village Dudhau, FNGO field team presented the village resources through Rangoli. After Rangoli presentation the team visited various sites and held meeting with the community at village Dudhau and shared information on climate change and its effects on agriculture.

They also provided important information on late Monsoon, drought, excessive rainfall, etc. and suggested that the farmers adopt climate reslient crops which can bear the adverse effects of changing climate.

#### Kandoi-Baundur (3<sup>rd</sup> May 2017)

The World Bank Supervision Mission visited two Gram Panchayats of the Division, namely Kandoi Bondur and Kunna on 3<sup>rd</sup> May 2017. In village Kandoi Bondur, the Mission visited the sites of water irrigation tanks and

discussed on the mechanism of water distribution and cost sharing by the UGs for future maintenance and sustainability of assets.

Thereafter the Mission visited the village and inspected the activities like Sewing Centre, Poly-house, potato demonstration and afforestation activities undertaken by the project.

A community wide meeting was conducted in the village and a lot of useful information was shared by villagers with the Mission. The Mission wanted to understand the process of social mobilization, institution building and their functions, cost sharing by the User Groups for maintenance of assets, performance of Vulnerable Individuals etc. The Mission also discussed the progress of works undertaken by ABSO in the villages as well as in the area.

### Kunna (3<sup>rd</sup> May 2017)

After visiting different sites of village Kandoi- Bondur, the Mission visited the project work site of village Kunna and conducted community meeting to assess the understanding of community on project objectives, plans and implementation. During the community meeting at Kunna, the Mission interacted with the villagers and villagers gave satisfactory answers to their queries on project

and project activities. Mr. Fokkey Fennema, the Agribusiness Expert of the Mission asked several questions from the villagers on agricultural practices, crops grown in the villages and suitable market for these crops. Mr. Sudhirender Sharma, the Watershed & M&E Expert of the Mission discussed various issues with the community as well as project staff about Gramya-II and provided valuable inputs to the community to ensure sustainability of the project. After visit of the Mission to Kunna village, the villagers presented a folk song in the honor of the Mission. The Mission thanked the villagers for their cooperation.

#### PMU, MMWS, Raipur

World Bank Supervision Mission visited village Dhaksari of PMU, Raipur on 10<sup>th</sup> May 2017. During visit to Dhaksari, the Mission observed the progress of Irrigation tanks, HDPE Pipe line, and vulnerable households of Goatry in the village.

In village Dharkot, the Mission visited the afforestation site and flour mill of vulnerable

household. In village Kuthar, the Mission witnessed solar pumping system and discussed about monitoring and maintenance of the scheme.

In village Tangoligarh, the Mission visited the sites of soil conservation and afforestation and held discussions on the mechanism for monitoring of these works.

#### Thano (June 23, 2017)

Dr. Ranjan, Country Director India, World Bank visited the sites of project villages and held Meeting with Pradhan and farmers. During meetings with the Gram Pradhan and farmers he gave more emphasis on agriculture surplus and irrigation facilities.

Farmers can increase production of Ginger, Tomato, Beans and Pea to produce marketable surplus. He suggested that villages with lack of road connectivity should be identified to see if anything can be done through the project for the same. Without road connectivity, villages cannot develop and improve their business.

# (III) Harela

#### **Pauri Division**

During the month of July 2017 the Harela festival was celebrated in which plantation work for promoting biomass and soil conservation was carried out with the help of community members in several Project Villages. The villagers are motivated on protection of forest and villages and are also informed about

the correct method for cutting of tree branches and vegetation for fodder as also the

rational use of the same.

#### **Tehri Division**

The Division celebrated Harela in all units with participation of Gram Panchayats.

- Kempty Unit: In Kempty Unit, Harela was celebrated in Gram Panchayat Rayatgaon, Lagwalgaon, and Siya Kempty.
- Nainbag Unit: In Nainbag unit, the villagers of Khairad and Myani participated in the program.
- Thatyur Unit: In Thatyur unit, village Thatyur, Papra, Shish, Kyari, Aglad Sera and Lalotana were covered under Harela program.

This year, fruit species of Lemon and Mango were planted in the villages. During plantation of these fruit species in the villages, a great enthusiasm was observed among the villagers. This indicates the awareness level of villagers towards environment protection and its conservation. During meetings among the villagers at their respective GP or RVs, the FNGO field team checked the progress for survival of fruit trees planted during last year. It was observed that the plants are well taken care of by the villagers and have a good growth.

#### **Dehradun Division**

During the month of July 2017 the FNGO field staff was involved in plantation of horticulture and Napier species under Harela. The plantation of fruit saplings was carried out in village Kharaya, Dileu, Sainj, Kishau in Sahiya unit; Thana, Samog, Jogio, Rawna in Chakrata unit and LakhaMandal, Dhaurapudiya, KandoiBaunder, Chhultad, Punah-Pokhari, Bijanu and Rangeu in Kwansi unit of the Division.

#### PMU, MMWS, Raipur

To increase awareness among the villagers on Environmental issues, the FNGO field staff mobilized the villagers of Haldwadi, Baderana Manjhla, Sindhwalgaon, Tangoligarh, Upper Talia, NahiKalaa, Sateli and planted various species of fruits in these villages with the help of local communities. Under Harela, 170 fruit plants of Jackfruit and Lemon were planted.

On 26<sup>th</sup> July 2017, a group of Agakhan Foundation of Afganistan visited Tangoligarh and Darkot villages of the project. Agakhan Foundation is an International NGO who run their programs in various countries. During the field visit, the participants of this exposure team learned about soil, water and forest conservation activities of the project.

### (IV) World Bank Supervision Mission

During the month of December 2017, the World Bank Supervision Mission, Agricuture Expert visited the sites of Tehri Division in Gram Panchayats Bhatoli and Khyarsi on 6<sup>th</sup> and 7<sup>th</sup> December, respectively.

**Gram Panchayat Bhatoli:** On first day of his visit, the World Bank Agribusiness Expert, Mr. Fockay, alongwith Dr. Kavi, Joint Director, WMD; Dr. Singh, Deputy Director Horticulture; Deputy Project Director, Tehri Division; Sub Divisional Officer (Agri-Horti officer), Tehri Division; Unit Incharge, Kempty; Conevenor & Coordinator, FNGO; Gram Pradhan, Bhatoli and Village Incharge visited the sites of village Chamiyana, Banogi and Bhatoli. During visit to the villages, the team also interacted with the villagers and disclosed information regarding establishment of 'Centre of Excellence' in GP Bhatoli.

The team also shared with them the following information:

 Motivated the villagers to take up cultivation of high value vegetable crops on their land with the help of high-tech ploy-houses.

- Mr. Fockay, an Agriculture Expert of World Bank, shared his experiences of Netherland on high value vegetable crops and encouraged the villagers to go in for collective farming of high value crops through cluster approach.
- Besides availability of land in these villages, there is also sufficient availability of
  irrigation water and market in the vicinity of these villages. The farmers generally grow
  vegetables in very small quantities and sell the same in Mussoorie and Vikasnagar
  markets. Collective farming of high value vegetable crops can go a long way in improving
  the socio-economic status of villagers in these villages.
- It was told that preferably, cash vegetable crops such as French beans, capsicum, lady finger, tomato, etc. can be grown in these villages and sold in the market in bulk quantities. All the three villages are located on road head and have sufficient infrastructure available for the purpose.

**Gram Panchayat Khyarsi:** On second day, the team visited village Khyarsi and assessed the potential for setting up Centre of Excellence in this Gram Panchayat. Experts and the team discussed with the villagers the modalities regarding vegetable cultivation, animal husbandry, water conservation, irrigation, etc. in their village. The site was found feasible for this activity and villagers gave a warm welcomed to the team. Facilitator and Motivator presented project activities undertaken in the village through "Rangoli".

# (V) Swachhata Abhiyaan (Cleanup Campaign)

#### **Pauri Division**

In view of the focus of State and Central Government on cleanliness drive in urban as well as rural areas, Swachhata Abhiyan programme was organized in the project units as follows:

Kandalinadi Unit: In Kandalinadi unit, the cleanup campaigns were organised in village Masmoli, Pokhda, Bhaidgaon, Melgaon, Ghandiyal, Borgaon, Devradi, Bagdigaad, Veengaad, Sanglakoti, Chaidhar, Bhaduli and Veenadhaar from 2<sup>nd</sup> to 15<sup>th</sup> October 2017. During the cleanup camaigns in all the above mentioned villages, the team and villagers cleaned bushes in the surrounding of their houses, cleared village foot paths from bushes. Other common places such as community meeting hall, school, Anganwadi Centre, Panchayat

Bhawan, etc. were also cleaned during the campaign. Total 319 villagers, 19 public representatives and 41 project personnel and officers attended the cleanup campaign In Kandali Nadi unit.

On the occasions of cleanup compaining, information dissemination was done to make the villagers aware regarding the benefits of personal hygiene and environmental sanitation. In all the villages, the Day was also utilized in cleaning the village sorroundings.

Patisain & Santoligaad Units: Similar cleanup compaingns were organised in Patisain and Santoligaad units of the Division. The cleanup compaigns were organised in village Amotha Gunth, Binjoli, Gadari, Salan, Syoli, Raisoli, Latibau, Chaidhaar Malla, Kagtun, Kulasu, Gwad Malla, Gwad Talla, Majadi, Jaintoli Malli, Odgaon, Gurad Malla and Bhamoli from 2<sup>nd</sup> October 2017 to 15<sup>th</sup> October 2017. The objective of these cleanup compaings was to motivate the villagers on adopting cleanliness and hygiene. The village cleanup compaings were attended by the project personnel and officials who also joined the community in cutting bushes on village footpaths, cleaning community properties and surroundings of water sources. The project team motivated the villagers to clean the village and make it Open Defication Free.

#### **Tehri Division**

Swachhata Abhiyan programme was also organized in Kempty Unit (Revenue vilages Siya, Sainji, Banglo Ki Kandi, Jinsi, Bhediyan, Sartali, Khaaskudaun, Rayat Gaon and Talogi), Thatyur Unit (Revenue vilages Kheda Malla, Bhuyansari, Kakdu, Mundni, Kinsu, Odarsu,

Bangaar, Lalotana, Takarna, Chadoqi, Chouthi, Aqiyarana and Parodi) and Nainbag Unit (Tikri, etc.) during the month of October, 2017. The occasion was utilized in disseminating among villagers the benefits of personal hygiene and environmental cleanliness. The day was also utilized in cleaning the village sorroundings. The programme was participated by FNGO field staff and MDT members.

#### **Dehradun Division**

To generate awareness amongst villagers, a cleanup fortnight was also organized in Gram Panchayat Haripur, Tilwadi, and Vyas Nahari on 1.10.2017, 2.10.2017 & 3.10.2017, respectively. During cleanup campaigns, bush cutting, cleanliness of Panchayat Bhawan and plantation of Bel, Gudhal and Rudraksh plants was taken up. Total 125 villagers participated in the campaigns.

#### PMU, MMWS, Raipur

Swachhata Abhiyan fortnight was also organized in the micro watershed villages during the period 2<sup>nd</sup> to 15<sup>th</sup> October, 2017. Variety of activities such as, cleaning of public places and roads; water tanks; animal health camps; schools; anganwadi centers were undertaken in several villages Kaknawa, Dharkot, Haldwadi, Baderna kala, Barderna

Khurd, Baderna Manjhla, Tangoligarh, Kuthar, Sangaon and Upper talai.

Beside this students in schools were oriented on hand washing practices and other tips on personal hygiene. Importance of hygiene in food items was also told to the villagers.

# (VI) "GRAMYA SHREE" OUTLETS

During the month of December 2017, two 'Gramya Shree' outlets were opened, i.e., one in WMD Campus Dehradun and another in village Kaknawa in Thano, Raipur for providing suitable market to the local products at WMD, Campus Dehradun and village Kaknawa, of

PMU Raipur. The results of these outlets are encouraging for the local farmers and FIGs. The World Bank Supervision Mission appreciated the initiative during their visit to WMD, Dehradun. Mr. Fockay, an Agribusiness Expert of the Mission inaugrated the outlet at WMD Campus Dehradun on 5<sup>th</sup> of December 2017 in the presence of Bank team and the Project Director, Gramya-II besides other project staff.

### (VII) Meeting on Climate Change:

A Division level meeting on Climate Change was conducted on 17<sup>th</sup> October 2017 at Dehradun Division, Vikasnagar. In the meeting, the experts shared information on Climate Smart Agriculture with FIG members. The experts laid emphasis on making climate resilient agriculture to improve agriculture production and reduce pre and post agricultural losses. To achieve this goal, encouraging, adopting and

promoting improved techniques and adopting indigenous seeds and crops besides preparing a gene pool of local seeds which can tolerate the drought, etc. was discussed. Experts were of the view that more and more farmers should be mobilized to adopt rainwater harvesting technique for making optimum utilization of rainwater. Average rainfall in the state is 1250 mm. Around 100 farmers participated in the meeting and learned about Climate Smart Agriculture to make their farming resilient to climatic changes. Meeting was quite beneficial for the local farmers.

# (VIII) Process Documentation:

FNGO Teams regularly documented the impact of Project interventions as case studies/success stories of project villages as regards capacity building, participation, income enhancement and other benefits taken by the project beneficiaries. Some of the case studies which reflected the impact of Project interventions in the village communities in different areas and activities. A series of case studies documented during the year 2017-18 are reproduced going ahead.

# **Project Highlights**

# **Harvesting Profit**

**Gram Panchayat** Kunna

Unit Kwansi

Division Dehradun, Vikasnagar

# **Background**

Kunna is one of the 16 Gram Panchayats selected for project interventions in Kwansi Unit of Dehradun Division, Vikasnagar. Situated at a height of 1700-1722 meters above sea level, the GP is a part of Myudagad Micro Watershed. The Gram Panchayat has a population of 391 comprising of 73 households.

#### **Process**

During the monsoon season, 2017 it was planned to grow off season pea crop in the village under cluster approach as it fetches good price in the market around Deepawali. Accordingly, the progressive farmers in the GP were mobilized to come forward for cultivation of off season pea crop with input and technical support from the project under cluster approach. Based on the location of their agricultural land in a cluster, 10 of the total aspiring farmers were selected for the cluster demonstration of off season pea crop on total 3.12 hectares of land.

After formation of cluster, the farmers were distributed with 3.00 quintals of S-1 variety of hybrid seeds for cultivation in the month of August 2017. The farmers were apprised with the latest technology for sowing and caring of the crop. The organic and chemical pesticides were also provided and sprayed from time to time for protection of the crop.

### Outcome

Finally the crop was ready for to hit the market in October 2017 around Deepawali season. The following output was received from the demonstration:

SN	Name of the Beneficiary	Land Area (Ha)	Total Production (Qtl)	Unit Rate (per Qtl.)	Total Sale Value (in Rs.)	Net profit after deducting input cost and labor (in Rs.)
1.	Sh. Mahavir Dobhal	0.600	24	6,000	1,44,000	1,10,000
2.	Sh. Ajab Singh	0.400	16	6,000	96,000	80,000
3.	Sh. Babu Ram	0.300	12	6,000	72,000	60,000
4.	Sh. Geeta Ram	0.320	14	6,000	84,000	70,000
5.	Sh. Pyare Lal	0.280	11	6,000	66,000	50,000
6.	Sh. Sunil	0.240	10	6,000	60,000	42,000
7.	Sh. Suresh	0.200	9	6,000	54,000	40,000
8.	Sh. Deewan Datt	0.200	9	6,000	54,000	40,000
9.	Sh. Kamla Dass	0.180	8	6,000	48,000	34,000
10.	Sh. Baru Datt	0.400	16	6,000	96,000	80,000
	Total	3.120	129		7,74,000	6,06,000

The total production obtained was around 41 quintals per hectares. Although, the production achieved is less than the standard yield, yet the farmers were able to make better profit by fetching higher rate in the market due to off season crop.

One of the Farmers, Sri Mahavir Dobhal asserted, "Earlier our focus was on cultivation of maize, wheat and other traditional crops, but Gramya has shown us the way to earn higher rate of profit by growing high yielding cash crops.

> — Ms. Jalma Chauhan Facilitator, Unit Kwansi

# **Reclaiming Wasteland**

Revenue Village : Vyasnahri

Gram Panchayat : Vyasnahri

Unit : Sahiya

Division : Dehradun, Vikasnagar

# **Background**

Vyasnahri is a Gram Panchayat in Sahiya Unit of Dehradun Division, Vikasnagar. The village is situated on the Banks of Yamuna with Amlav River flowing through the village providing irrigation water to the agricultural fields of the villages. Unfortunately, during Kedarnath disaster in the year 2013, the overflowing River Amlav flooded the fields of Vyasnahri situated on its banks thus turning acres of cultivable land into wasteland, adversely affecting the livelihood of a number of families. The fields were heavily flooded with boulders and debris and there were no means left for reclaiming the same and villagers had no option but to bear the brunt.

#### **Process**

Fortunately, with the initiation of Gramya-II the plight of these farmers was brought into the notice of field staff and higher officials at the division level and it was planned to chalk out a viable strategy for reclaiming the barren land. The team of experts and DPD reached at the conclusion that the only workable solution was to reclaim the land by planting fruit trees of some sturdy variety which can stand the adverse weather conditions. The strategy was discussed with the villagers and they were mobilized for plantation of Pomegranate in cluster approach on pilot basis. The farmers agreed to the proposal and coming forward pooled 0.65 ha of barren land for the purpose.

The shrubs on the land were cleared and pits of the size of 1mt.x1mt. were dug and filled with cow dung mixed soil recovered from the pits. Suitable medicines and pesticides were also provided in the pits and 500 pomegranate saplings of Mridula and Bhagwa variety were planted with in the year 2015. In view of water scarcity, around 200 saplings were also provided with drip irrigation system. The beneficiary farmers have taken collective responsibility for taking care of the plantation.

#### **Outcome**

The plantation is growing well and the same would start bearing fruit in another 2 to 3 years, thus providing financial support to them farmers. Fascinated by this, several other farmers of the area have come forward for horticulture activities in their land.

— Ms. Sangeeta Sharma

Facilitator, Unit Sahiya, Dehradun Division

# **Grinding for a Living**

**Revenue Village** Nahikala

**Gram Panchayat Thano** 

Unit **Thano** 

Division **PMU Raipur** 

# **Background**

Nahikalan is one of the seven Gram Panchayats selected in PMU Raipur under Uttarakhand Decentralized Watershed Development Project. The Gram Panchayat comprises of 5 Revenue Villages situated at a distance of 5 to 7 kms from Thano. Out of total 24 families, presently there are 17 Households residing in RV Nahikalan whereas other 7 have migrated to Bhogpur nonavailability road connectivity, education and health facilities in the RV and nearby areas. The villagers have constructed a fair weather road for plying of

two wheelers with their own efforts and dare the risk of commuting up to Thano and other villages by their motorcycles on this difficult path. The life becomes even more miserable during monsoon season when even this road is damaged. Since there was no flour mill in the area, the villagers faced difficulty for grinding of wheat, especially during monsoon season.

#### **Process**

With the initiation of Gramya-II in the area, PRA meetings were conducted in the villages to understand their difficulties and needs to combat the same. Need for one grinding mill emerged as one of the major problems of Nahikalan and its RVs. During open meeting of the village, the name of Smt. Krishna Devi was proposed for selection as beneficiary of grant under vulnerable fund. Taking into account the demand for floor mill, she was granted an amount of Rs. 30,000.00 which helped her set up a floor mill in her house in RV Nahikalan. This has not only helped Smt. Krishna Devi in establishing her own income generating activity but has also proved a boon for the villagers who do not to carry the head load of their grains upto thano for grinding. They can now avail the facility of grinding wheat, millets, maize, coriander, turmeric, chili, etc. it the village itself thus saving their valuable time.

#### Outcome

As per Smt. Krishna Devi, she was able to earn upto Rs. 400.00 per month but now her income has gradually increased and she is earning more than Rs. 2000.00 per month. Till date she has earned more than Rs. 50,000.00 from her flour mill. She has utilized the amount in cement flooring of her house and has also started sending her son to Jolly Grant for skill based training.

According to Smt. Krishna Devi, "I am grateful that Gramya has provided me livelihood in my house itself. Now I am able to spare daily fare for my son for commuting from Nahikalan to Jolly Grant and back."

— **Ms. Uma Chauhan** Facilitator, PMU Raipur

# **Gramya Revives Water Source**

**Gram Panchayat** Sanglakoti

Unit Kandalinadi

Division Pauri

## **Background**

Gram Panchayat Sangla Koti of Ekeshwar Block is situated in Bhaidgaon Gad micro watershed which in Kandali Nadi Unit of Pauri Division. The GP is inhabited by 61 households. Complete population of the village is dependent on piped water for their daily need of drinking water. Navlya water source which was the only water source providing drinking water to 31 households of Navlya Tok had dried up about 16 year back and people had almost forgotten it due to alternate availability of piped water. Several villagers like Shri Madan Singh, Shri Nandan Singh, Smt. Ramrekhi Devi, Smt. Bhageshwari Devi, Smt. Shakuntala Devi and Shri Dalbir Singh recall that this was the only available source of water several years back and all the households of Sanglakoti used to fill water from this source for their day to day needs of drinking and washing. During meetings with the project staff after initiation of Gramya-II, the villagers informed that their elders also used to tell them that

Navlya Tok was active and was used to fulfill their drinking water requirements long back. However, with the passage of time, the source had dried up and become a thing of the past. Due to availability of piped water, no action was taken for rejuvenating the water source by the villagers or Government departments.

#### **Process**

The villagers were informed by the project field staff that dried water source can be rejuvenated by certain treatment, such as, digging of pits and plantation work above the source catchment area. The community was encouraged by this and decided to undertake the work of rejuvenation of Navlya water source through the project. Recharge pits were dug with the help of village women above the water source. This has shown encouraging results with increased water discharge from the source. Since the water source was in dilapidated condition and the water was getting wasted and flowing here and there without any meaningful use.

To check the wastage of water from the source, the villagers have decided to revive the barren land close to the source and make it useful for cultivation of high value crops. More trenches are proposed to be dug above the source and plant Napier grass on farm bunds. This initiative is likely to add to the income of the farmers, besides revival of the wasteland which had become barren partially due to migration and partially on account of people losing interest in agriculture due to 100% dependence on rainwater for agricultural needs.

#### Outcome

The villagers are now happy with the revival of Navlya water source as this has given them a new hope for revival of their agriculture as also an alternative source of drinking water in case something goes wrong with the tapped water. Shri Nandan Singh happily exclaims, "We had never imagined that the lost water source can ever be revived."

> - Ms. Bhubneshwari Rana Facilitator, Unit Kandalinadi

# Hope for the Handicapped

Revenue Village : Bagdidhar

Gram Panchayat : Bagdigad

Unit : Kandalinadi

Division : Pauri

## **Background**

Shri Deepak Kumar who is a resident of Revenue Village Bagadidhar in Gram Panchayat Bagadigadh of Kandali Nadi Unit of Pauri Division is a physically challenged and slightly mentally retarded person. He lives in the village with his mother and brother who also is uneducated and works in some food joint in the vicinity. The mother somehow managed two square meal for self and her son Deepak by working as a laborer in construction site or in the field of other persons. The family had a very miserable condition during the recent past till they got a source of livelihood with the help of Gramaya-II.

#### **Process**

Since, the name of Shri Deepak figured in category three list of wealth ranking during PRA exercise conducted in the village during project initiation period. his name was proposed and selected unanimously for grant under the vulnerable individual fund of Gramya-II. He opted for poultry farming as his income generating activity and in the month of March 2017 he was granted Rs. 30,000.00 for initiating his IGA. With the help of Village Motivator, Shri Deepak managed to make a cage in his backyard and brought 100 chicks for Rs. 2400.00 @ Rs. 24.00 per chick. He took care of the chicks and also managed their feed from the amount received by him as grant.

#### **Outcome**

During meeting in village Bagadigad, Mr. Deepak himself committed that he has recently sold 22 chicks from his livestock for Rs. 6000.00 @ Rs. 250.00 to Rs. 300.00 per chick. Interestingly, keeping aside Rs. 500.00 for the poultry feed, he has deposited Rs. 5500.00 in his bank account. He told the project field staff that he intends to purchase the second lot of livestock and their feed from the amount kept aside by him in the bank.

Deepak's mother is a happy woman when she joyfully states, "Earlier when I returned home from work, I had to search for Deepak here and there, but now he is often found sitting near the poultry cage happily admiring the birds. Poultry a ray of hope for us and we will continue with this activity forever by all means."

> - Ms. Bhubneshwari Rana Facilitator, Unit Kandalinadi

## **Reaping Good Harvest**

**Gram Panchavat** Haldwadi

**Thano** Unit

Division **PMU Raipur** 

### **Background**

Gram Panchayta Haldwadi, which is one of the 7 intervention GPs in Project Management Unit, Raipur is situated at a distance of 15 kms from Thano. The GP is situated 2 kms away from the motorable road. The main profession of 52 households of the GP is agriculture. More labor and less yield has turned away the community from agriculture and they had become averse to this profession had started looking for some other means of livelihood in the nearby cities.

#### **Process**

With the initiation of Gramya-II in the division, the field staff of FNGO, alongwith MDT started the process of mobilizing the community to generate their interest in off season high yielding vegetable crops to enable them earn cash income from agriculture. Several rounds of small scale demonstrations were carried out for high yielding crops of vegetables to motivate the farming community to adopt the same for their livelihood. Finally, in the year 2015-16, the farmers of GP Haldwadi were mobilized for cultivation of PA 1100 high

yielding variety of peas under cluster approach. For cultivation of peas, 25 farmers came forward and pooled 2 hectares of land for the crop. The demonstrate on produced good results with total production of 66.75 quintals of pea production which was sold at Rs. 4,00,500/- giving a net profit of Rs. 300500.00 after deducting expenses.

#### **Outcome**

This encouraging rate of production, aroused farmers interest towards high yielding vegetable crops and an FIG was formed in the Gram Panchayat for cultivation of high yielding crops, such as Peas, French Beans, Ginger and Coriander, etc. under cluster approach. The FIG had been functional since then and had been producing and selling beans, finger, peas, etc. in the market. During the current monsoon season, the farmers were mobilized for cultivation of GS-10 variety of high yielding peas during off season on a bigger scale. Accordingly, 50 FIG member farmers came forward and pooled 4.84 hectares of land in GP Haldwadi. The seeds were sown during September 2017. The details of cluster cultivation of peas alongwith production and sales outcomes is given in the table below:

Total Benefi- ciaries	Coverage	_	Production per hectare (Qtl)	saie	Total Production (Qtl)	Total Sale Value (Rs.)	Net Profit after deducting 10% cost (Rs.)
50	4.84	1 qtl.	35	6000	169.40	10,16,400	9,14,800

Thus each participating farmer has earned a profit of Rs. 18,000.00 to Rs. 20,000.00, which they sold at a rate of ranging between Rs. 6000.00 to Rs. 8000.00 per quintal. Shri Rajpal Singh of Haldwari stated, "This has been a good experience as we have increased our profit manifold, firstly by high yielding crop and secondly by making off season harvest. Thus, each farmer has made good money. Now we intend to cultivate French Beans and Potato under cluster approach."

> — Ms. Geeta Rawat Coordinator, PMU Raipur

# **Rain Water Harvesting Tanks** Adds to Cash Income

**Gram Panchayat** Sadab

Unit **Kempty** 

Division **Tehri** 

## **Background**

Gram Panchayat Sadab of Jaunpur Block is situated in Devan Gad micro watershed in Kempty Unit of Tehri Division at a distanceof 27 kms from the Unit Office. The Gram Panchayat has a total geographical spread of 159.026 hectares with 56 households having a population of 555. During the PRA exercise conducted in the GP during initiation period, water for drinking and irrigation emerged as the major problem areas. Although, the village is having piped water supply yet drinking for animal and irrigation had been a major issue always. Water scarcity during summers further added to the woes of the residents and they had to depend on supply through tankers.

The only water spring available is 500 meters below the village which is of no

use to the villagers and there is no farm land nearby and being too low the water cannot be lifted for drinking or irrigation purposes. During extreme conditions the villagers turn to this spring to meet day to day demand of drinking water for self and cattle.

#### **Process**

After much braining storming by the project staff and the villagers, rainwater harvesting emerged as the only viable solution for their water needs and the same was incorporated in the GPWDP of the Gram Panchayat. The people were mobilized to adopted rainwater harvesting options and with little difficulty the people were convinced to adopted harnessing of rainwater. As a result, 42 roof water harvesting tanks were proposed in the GPWDP. Interestingly, as on date 32 of these proposed rainwater harvesting tanks harvesting tanks have been constructed and work on remaining 10 is in progress.

#### Outcome

The rainwater harvesting facility have helped in fulfilling water needs of villagers to quite an extent. The rain water on the roof in collected though a water channel in the tank below and used in the time of need. Besides this, the water supply to the village through pipe is also collected in the water tank. This has saved their labor of fetching water from the spring below. The water tanks are rejuvenated during rains which makes the villagers tension free. Most of the villagers have constructed their rainwater harvesting tanks close to their cattle sheds which again saves on their labor. With the construction of rainwater harvesting tanks, change has also bneen observed in the cropping pattern of the village as they have also taken a shift from traditional crops to growing vegetable crops due to availability of water.

According to villagers, "Now we are growing cash crops like Ginger, French bean, Pea and Potato in places of traditional crops, thus making cash income. Rainwater harvesting facility has also saved on our time and now this time be utilized for other important purposes.

Ms. Deveshwari PatwalFacilitator, Unit Kempty

# **Cash Crops increasing Income of Family**

Gram Panchayat : Ghandiyala

Revenue Village : Ghandiyala

Unit : Kempty

Division : Tehri

## **Background**

Ghandiyal is single Revenue Village Gram Panchayat of Jaunpur Block situated in Khira Gad micro watershed in Kempty Unit of Tehri Division. The GP is inhabited by 58 households with total 341 population. The Gram Panchayat has a geographical spread of over 236.724 hectares. At the time of initiation of Gramya-II in the division the villagers of Ghandiyal were largely dependent on traditional farming cultivating wheat, maize corn, paddy, finger millet and pulses for subsistence.

Even though majority of the households of the village are engaged in agriculture, most of the land is rainfed except for a perennial stream flowing near the village serving as a source of irrigation for a part of the agriculture land of the village. However, some households of the village had been engaged in growing vegetables but were doing so only to meeting their domestic needs.

#### **Process**

Since the inception of Gramya-II in the division, the field staff and been encouraging the farming community of the village to adopt cultivation of off season high yielding variety of vegetable crops to earn cash income. These efforts were further substantiated organizing exposure visits of progress farmers to other locations where farmers were engaged in cultivating these crops under similar conditions. Besides this, trainings were also imparted to have a departure from traditional farming methods to improve technologies in agriculture. Demonstrations of improved variety of seeds were conducted on ginger and pea cultivation.

Mr. Vinod Singh and Mr. Kalyan Singh of the village were provided with 100 kgs of 'Maran' variety of ginger seeds for demonstration purpose. These seeds were cultivated on 2 nalis of land. Sowing and caring was done as per technical support of project experts. The less followed line method of seed sowing was followed. Good amount of cow dung compost, regular care and timely intercultural treatment helped in achieving good yield of ginger crop of more than 7 times the seed sown.

#### Outcome

Both these farmers sold their farm produce of 720 kgs in the market @ Rs. 30.00 per kg and earned Rs. 21,600.00. They made a net profit of Rs. 20,900.00 after deducting Rs. 700.00 towards truck freight. Mr. Vinod and Mr. Kalyan Singh are motivating other members of their FIG for adoption of cash crops. For the ensuing season, the members of this FIG have planned to cultivate Maran variety of given on large expanse of land under cluster approach.

> Ms. Binita Baratwal Facilitator, Unit Kempty

# **Making Vermi Compost for a Living**

**Gram Panchayat** Thano

**Revenue Village** Kaknawa Maichak Talai

Unit Raipur

**Division** PMU (MWS), Raipur

## **Background**

Shri Mukesh Tiwari, S/o. Shri Mast Ram Tiwari is a resident of Revenue Village Kaknawa Maichak Talai of GP Thano. Shri Mukesh is a graduate who has done diploma course in Hotel Management. After obtaining diploma in Hotel Management, he was trained in Banaras and thereafter he worked in several good hotels in Bombay for more than 10 years. Due to his family problems he also worked in Dehradun for two years from 2012 to 2014.

### **Process**

After the initiation of Gramya-II in the Division, Shri Mukesh started taking keen interest in Gramya activities and attended each and every meeting of the project. Being an educated person, he was appointed on the post of Accounts

Assistant in the project, which provided him with a fixed income in the village itself to meet the daily needs of his family. This encouraged him to take up other ventures for a living. During project meetings, trainings were conducted in the Division where demonstrations were carried out on compost making and villagers were told about the disadvantages of using chemical fertilizers and pesticides in the fields. The farmers identified and selected by the project were provided with compost pits for demonstration purpose. Shri Mukesh was one of the recipients of compost pit with aid from the project. These compost pit have a capacity of producing 20 to 24 quintals of vermi compost per year in four cycles of 3 months each.

Along with the compost pits, the beneficiary farmers were also provided with 2 kgs. of Eisenia Foetida variety of earth work, popularly known as red worm. These earth worms feed on the carbonic elements and soil and produce good quality fertilizer which contain enzymes, vitamins and microbial which provide useful nutrition to the crops. These worms can eat and digest waste up to 3 to 6 times of their weight. As these worms grow to the age of 50 to 60days, they deliver cocoons (eggs), each cocoon having a capacity to produce 6 to 14 baby worms. These worms have a life cycle of 75 to 90 days. The vermi compost pit must be kept free of plastic, wood and cloth.

#### Outcome

With the use of 5 quintals of vermi compost in his crop of Tomato, Turmeric, Chilli, Arbi, ginger and Guldawdi flowers, Shri Mukesh has made an income 47,000.00. He also sold the surplus quantity of vermi compost for Rs. 7,000.00 to other farmers at the rate of Rs. 10.00 per kg. According to Shri

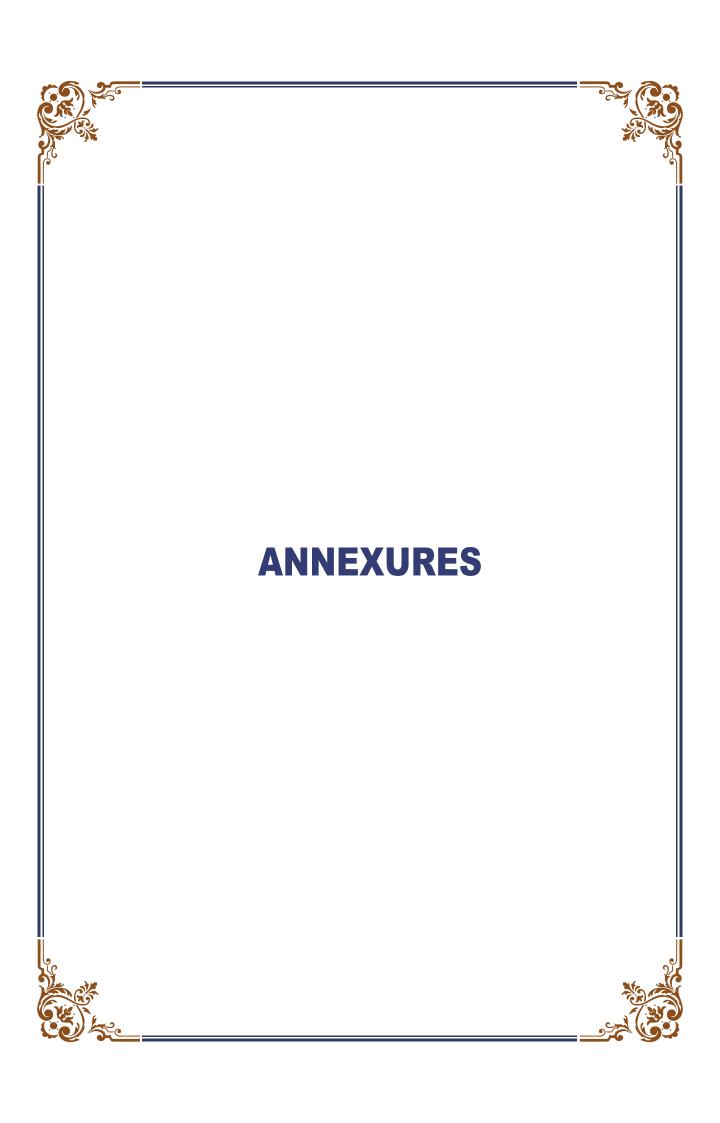

Mukesh, he has advance booking for vermi compost. The break of his agriculture income had been as follows:

<b>Product Name</b>	Quantity (Kgs.)	Rate (per kg.)	Amount (Rs.)						
Vermi-compost	700	Rs. 10.00	7,000.00						
Ginger	500	Rs. 40.00	20,000.00						
Masoor	90	Rs. 80.00	7,200.00						
Turmeric	84	Rs.150.00	12,600.00						
Tomato	170	Rs. 20.00	3,400.00						
Beans	15	Rs. 60.00	900.00						
Fresh Coriander	32	Rs. 50.00	1,600.00						
Guldawadi Flowers	17	Rs. 80.00	1,360.00						
	Total 54,060.00								

Encouraged by the results of agricultural output and increased demand of vermi compost, Shri Mukesh is planning is take up compost making on a large scale. A happy Shri Mukesh state with a deep sense of gratitude "I am grateful that has Gramya has provided me with an opportunity to return to my village and think about life in a different way and explore other opportunities."

> -Swati Panwar PMU (MWS), Raipur
